Introduction

You can download the Kingswood herd app onto your Apple or Android smart phone. Additionally you can log into the Kingswood herd mobile app platform on the internet using a range of devices such as; Smartphone, Windows computers and tablets, Macbook, iPad etc. This can be found at the web address <https://www.kingswoodfarm.ie>.

You are entitled to use both app methods on as many devices as you want.

There are different versions of the Kingswood herd app depending on your cattle system e.g. dairy or beef etc.

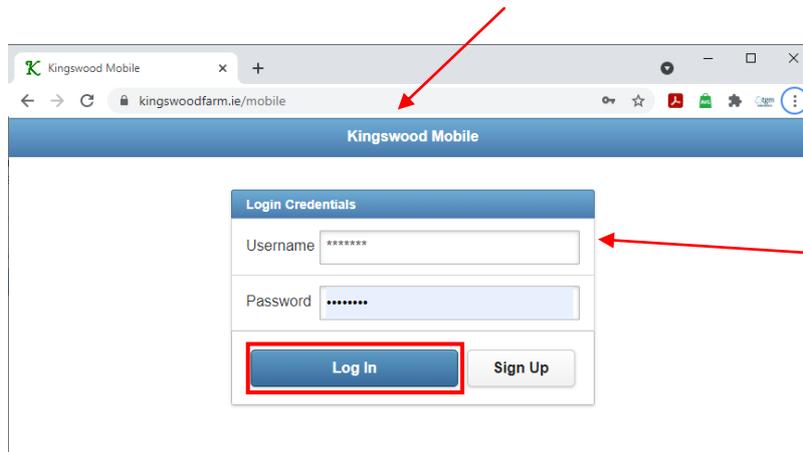

Kingswood will send you an email with your login credentials. Your username will be your herd number. Your password will be a 7 character combination of letters and numbers.

Kingswood Herd App Internet Platform

Open up the browser such as Google Chrome or Firefox etc on your chosen device and type into the address bar "<https://www.kingswoodfarm.ie>".

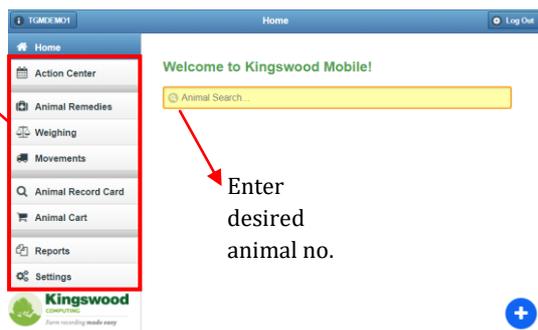

The image to the left is what will appear once the web address is entered. Enter your username and password in the appropriate boxes and log in.

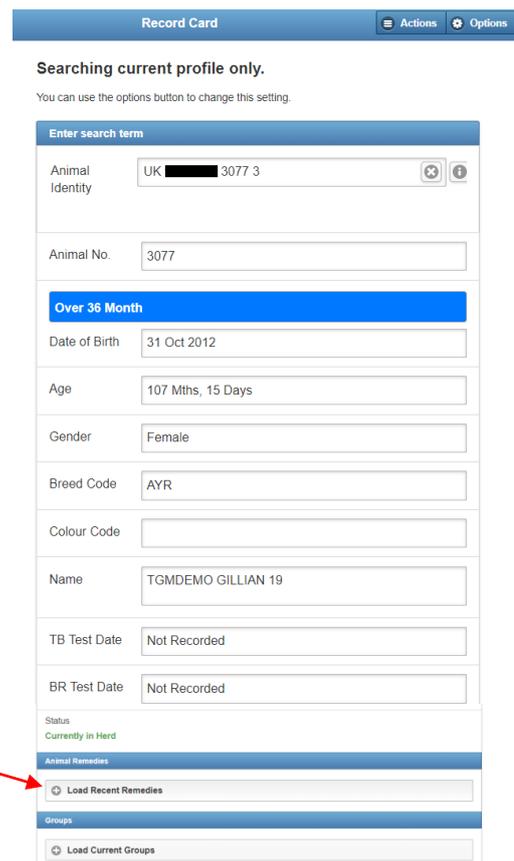

Home Page

The home page will be displayed once you have successfully logged into the online Kingswood Herd app shown below. The main navigation options will appear on the left hand side of the screen. On the home page you can search specific animals within your herd entering the animal's number in the search bar provided.

Navigation Options

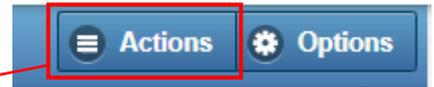

Enter desired animal no.

Once an animal no. has been entered all the details of that specific animal is shown, demonstrated in the image on the right.

Click on the plus symbols to obtain more information for that section.

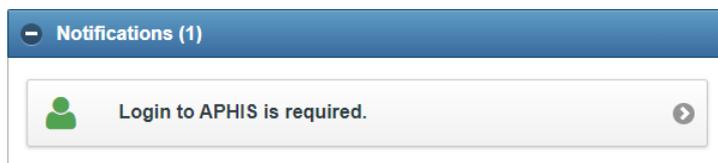

Selecting the “Actions” button at the top right of the screen after searching for a specific animal will bring up the following menu:

Then select an option from the menu to add a chosen action from the list to that specific animal.

Action Centre

After selecting the “Action Centre” on the navigation menu, the screen below will be shown. It is important to make sure that Aphis has been logged into. Select the “Login to APHIS is required” option and it will redirect you onto the DAERA log in where you select “GG Sign in/register” under the Government Gateway. Once the login has been completed on Aphis, it will redirect you back to the Kingswood Herd app browser page.

GG Sign in / register

Sign in to using your DAERA online services Government Gateway account.

Animal Remedies / Feeds

Adding a Treatment to 1 Specific Animal

When the “Animal Remedies” button is selected on the navigation menu the screen displayed below will be shown. Selecting the “Enter Remedy Event” will bring up a “Remedy Event” page. An animal that has been treated can be searched in the “Animal Identity” box and the treatment that was given to that specific animal can be added by selecting the “Add Treatment” button.

The image shows the 'Animal Remedies/Feeds' navigation menu on the left. The 'Enter Remedy Event' option is highlighted with a red box. A red arrow points to the right, where the 'Remedy Details' form is displayed. The form includes fields for Date (27/09/2021), Prescribing Vet (Select), Animal Selection (Search, Cart, Herd), Animal Identity (UK [redacted] 3338 1), Treatments (Select), and Comment (Antibiotic Dry Cow Treatment). A 'Save Remedy Event' button is at the bottom. A red arrow points down to the 'Treatment' form.

The “Treatment Details” box displayed to the right will appear. If the “Search” button is selected you can enter all the details of the treatment administered to that animal and the reason for administration. Selecting the “Recent” option will allow you to search a selection of recently searched and administered treatments. Selecting the “Common” button will allow you to select from a list of commonly selected treatments administered in your herd.

If the batch number entered for the treatment has not been entered on the ‘Enter drug purchase’ section, the message to the right will be displayed. You can then enter the details of the drug in the ‘Purchase Details’ window displayed to the right and select save. You will then be brought back to the Treatment details page.

A 'Confirm' dialog box with the text: "You have entered a new batch number - 6. Do you want to enter the purchase details now?" with 'Yes' and 'No' buttons.

6

The 'Treatment Details' form includes tabs for Drug Selection Method (Search, Recent, Common). It has input fields for Type first few letters..., Application Method (Select), Administered By (Self), Official Health Code (Optional) (Select), and Farm Health Code (Optional) (Select). An 'Add Treatment' button is at the bottom.

The 'Purchase Details' form shows drug information: Closamectin 5 mg/ml + 200 mg... / 5. It includes fields for Purchase Date (01/09/2021), Expiry Date (01/12/2023), Supplier (Grove Veterinary Centre), Quantity Purchased (5), and Cost Per Unit (£) (15.00). 'Save' and 'Cancel' buttons are at the bottom.

If the treatment being entered to the treatment details is commonly administered in your herd, create a template to allow quicker entry for this specific treatment for other animals. To do this select the “Template” button at the top right of the screen after all the treatment details have been entered. The “Template Name” box will then be displayed, enter a chosen name for this specific treatment. Continue selecting the “Ok” button to create the template until you are back to the “Treatment details” box. Once back to the “Treatment Details” box, to finish adding the treatment select the “Add Treatment” option.

If you do not wish to add this treatment to a template if it is not commonly administered, skip the template step and go straight to the “Add Treatment” button. This will then show the “Remedy Details” with the chosen animal and treatment added. If you wish to add another treatment to the same animal you can select “Treatments” and then “Add Another”. Once finished, the treatments added will appear in a list which is demonstrated below. Select the “Save Remedy Events” to complete the addition of a treatment to that specific animal.

The image illustrates the workflow for creating a treatment template and saving a remedy event. It consists of three main screenshots connected by red arrows:

- Left Screenshot (Treatment Details):** Shows the 'Treatment Details' form. At the top right, the 'Template' button is highlighted with a red box. The form includes fields for 'Drug Selection Method' (Search, Recent, Common), 'Type first few letters...' (Closamectin 5 mg/ml + 200 mg/ml Pour-On Solutic), 'Batch Number' (5), 'Drug Dosage', 'Application Method' (Pour-On), 'Administered By' (Self), 'Official Health Code (Optional)' (Parasitic Infection), and 'Farm Health Code (Optional)' (Select). The 'Add Treatment' button at the bottom is also highlighted with a red box.
- Middle Screenshot (Template Name):** Shows a dialog box titled 'Template Name'. The 'Name' field contains 'Closamectin Wormer'. The 'OK' button is highlighted with a red box.
- Right Screenshot (Remedy Details):** Shows the 'Remedy Details' form. The 'Date' is 27/09/2021, 'Prescribing Vet' is Select, and 'Animal Selection' is Search. The 'Animal Identity' is UK [redacted] 3338 1. The 'Treatments' dropdown is Select. A list of treatments is shown, including 'Closamectin 5 mg/ml + 200 mg/ml Pour-On Solution' with details: '1 POURON, 1 x daily, for 1 day', 'Batch No: 5', and 'Parasitic Infection'. The 'Comment' field contains 'Remedy Event'. The 'Save Remedy Event' button at the bottom is highlighted with a red box.

Adding Treatments to Multiple Animals

Entering a treatment to multiple animals follows the same process as before. However, the “Cart” option must be selected in the “Animal Selection” option. If your cart is empty, select the “Add Animals To Cart” option, to add the animals that all received the same treatment. Your herd list will be brought up and it is possible to search and filter for specific animals. Clicking on the grey plus button adds the desired animals to the cart.

The first screenshot shows the 'Remedy Details' page. The 'Animal Selection' section has 'Cart' selected. The 'Add Animals To Cart' button is highlighted with a red box. A red arrow points to the second screenshot, which shows a search screen with the message 'The cart is empty. Tap an animal to put it in the cart'. A list of animals is shown with their National IDs and a plus button next to each. The plus button for the first animal (UK 5777) is circled in red. A red arrow points to the third screenshot, which shows the '4 Animal(s) In Cart' screen with a list of the selected animals: UK 00365, UK 2935 1, UK 2994 4, and UK 1234 4.

To remove or view the animals that have been added to the cart for treatment select the “X Animal(s) in Cart” option that is displayed in blue underline. The screen to the right will then be shown to check the correct animals are in the cart for administration of the treatment. Delete animals that should not be in the cart for the treatment with the grey x button.

The screenshot shows the '4 Animals in Cart' screen. It has a search bar and a list of animals with their National IDs and a grey 'x' button next to each. The animals listed are UK 5777, UK 3185 7, UK 1111 7, and UK 2638 5.

The screenshot shows the 'Remedy Details' page. The 'Animal Selection' section has 'Cart' selected. Below the 'Cart' button, it says '4 Animals Selected From Cart'. The 'Save Remedy Event' button is visible at the bottom.

Then select the “Back” button at the top left of the screen until you are brought back to the original “Remedy Details” page. Continue with the addition of a treatment as stated in the section before. Finally select the “Save Remedy Event” button to complete the addition of the treatment to the selected animals.

Adding Treatments to the Whole Herd

Finally, entering a treatment to the whole herd follows the same process as before. However, in the “Remedy Details” page click the “Herd” option for the “Animal Selection” box shown to the right. Enter your treatment as described before and select “Save Remedy Event”. This will automatically update the whole herd’s treatment details.

Navigating the Rest of Animal Remedies/Feed

Within the “Animal Remedies/Feed” page it is also possible to view the most recent remedy events that have been entered. The top right button lets you navigate between the entering and viewing recent remedy events. It is also possible to enter drugs and feed purchased in this section. The “Treatment Templates” is where the templates previously made are stored and can be deleted if no longer applicable.

Weighings

When the “Weighing” option in the navigation menu is selected, the screen below will be displayed. The page enables you to enter the weight of a specific animal within your herd. The purchase information can be viewed for the particular animal entered into the animal identity by selecting the “Purchase Information” button in the top right corner. Selecting the “Recent” button will display a ‘Recent Weighing’ window displayed below. Here you can select for animals weights between specific dates. You can also save the information as a PDF or print the list of animals and their weights. Selecting the “Enter” button at the top right of this page will bring the “Enter weighing” page back again.

Animal Identity	Date	Weight
UK [redacted] 1111.7	22/09/2021	50
UK [redacted] 1234.4	28/10/2021	50
UK [redacted] 1477.2	01/10/2021	50
UK [redacted] 3333.3	01/09/2021	50
UK [redacted] 3334.4	10/09/2021	50
UK [redacted] 3335.5	10/09/2021	50
UK [redacted] 3336.6	05/09/2021	50
UK [redacted] 3337.7	03/09/2021	50
UK [redacted] 3338.1	05/09/2021	50

Movements

When the “Movements” button is selected on the navigation menu, the screen below will be displayed allowing recent purchases, sales and deaths to be viewed and recorded. If the enter option has been selected, for example a purchase, an “Animal Purchase” page will be brought up to enter all the details of the purchase. Select the “Recent” button at the top right of the screen to then display the recent purchases and vice versa as displayed below. This is the same for the sales and deaths pages as well.

The image shows three screenshots from a web application. On the left is the 'Movements' navigation menu with options: Enter Purchase, Recent Purchases, Enter Sale, Recent Sales, Record Death, Recent Deaths, and MC2 Movement Notification. A red arrow points from 'Recent Purchases' to the middle screenshot, 'Animal Purchase', which has a 'Recent' button in the top right. The 'Animal Purchase' form includes fields for Event Date (16/11/2021), Supplier (Select), Buyer (Select), Add Animals (Add Animal button), and Comment (Purchase Event), with a Save Purchase button at the bottom. A second red arrow points from the 'Recent' button in the 'Animal Purchase' screen to the right screenshot, 'Recent Purchases', which has an 'Enter' button in the top right. The 'Recent Purchases' screen shows filters for From (02/11/2021) and To (16/11/2021) dates, an Apply button, a display count of 10 events, a search bar, and a table with columns for Animal Identity, Date, and Supplier. One row is visible: UK [redacted] 5067 2, 16/11/2021, E L Gillen. It also includes pagination (Showing 1 to 1 of 1 events, Previous, 1, Next) and Print/PDF buttons.

Selecting the “MC2 Movement Notification” will display the screen on the right. Here you can authorize to request a form for the movement of animals in your cart to another customer. Edit the animals to ensure the correct animals are selected in the car for movement. To do so select the “Edit Cart” option at the top right of the screen and delete or add animals as required. Ensure you have logged into Aphis in the action centre section before completing this request.

The image shows the 'MC2 Movement Notification' screen. At the top right is an 'Edit Cart' button. The main form area is titled 'MC2 Form Details' and includes a Customer dropdown (Select), a Date of Movement field (16/11/2021), and a summary bar showing '+ 4 animals to be listed on form'. Below this is a 'Confirmation:' section with a yellow warning box: 'This E-notification does not confirm any formal authority to complete the proposed movement. The responsibility remains with the herd keepers that all testing and movement requirements are satisfied before any animals move on or off their premises.' There is also a 'Disclaimer' button with an upward arrow. At the bottom is a large blue button labeled 'Request Movement Form'.

Search Animal Record Card

To search for an animal record card in the herd, select the “Search Animal Record Card” in the navigation menu. The screen below will be displayed and enter the specific animal number into the “Animal identity” box. The page will then bring up the record card of that animal. The “Actions” button at the top right of the screen allows you to add a range of actions to that animal. The “Options” button allows you choose between searching the current herd profile or all animals.

The screenshot shows the 'Record Card' interface. On the left, a search form titled 'Record Card' with an 'Options' button. Below it, a section 'Searching current profile only.' with a sub-note 'You can use the options button to change this setting.' and an 'Enter search term' box containing 'Animal Identity'. A red arrow points to the main record card. The main record card has 'Actions' and 'Options' buttons highlighted in red. Below these is another 'Searching current profile only.' section with a sub-note 'You can use the options button to change this setting.' and an 'Enter search term' box containing 'Animal Identity'. Below this is a table of animal details: Animal Identity (UK [redacted] 3077 3), Animal No. (3077), Date of Birth (31 Oct 2012), Age (108 Mths, 16 Days), Gender (Female), Breed Code (AYR), Colour Code, Name (TGMDEMO GILLIAN 19), TB Test Date (Not Recorded), and BR Test Date (Not Recorded). To the right, a 'Choose an action' menu is open, listing actions like 'Query APHIS', 'Add To Cart', 'Add Note', 'Enter Remedy', 'Enter Weighing', 'Enter Sale', and 'Enter Death', with a 'Cancel' button. Below the menu, a 'Search Options' dialog is shown with two radio buttons: 'Search Current Profile' (selected) and 'Search All Animals'.

Animal Cart

Selecting the “Animal Cart” option in the navigation menu allows the animals that are currently in the cart to be viewed which is shown below. Before completing an action related to the cart it is important to remove or add the correct animals. To remove an animal from the cart select the grey x beside their ID. Search the animal number in the search bar if there are numerous animals in the cart.

The screenshot shows the 'Animal Cart' interface. On the left, a section '2 Animals in Cart' with a 'Cart Options' button. Below it, a search bar 'Find Nat. Id. No...' and two rows of animal details: UK [redacted] 1111 7 and UK [redacted] 2638 5. A red circle highlights the grey 'x' button next to the second animal's ID. In the center, the word 'OR' is displayed. On the right, a search bar contains '1111' and a red circle highlights the grey 'x' button next to it. Below the search bar, two rows of animal details are shown: UK [redacted] 1111 7 and UK [redacted] 1111 7, with a red circle highlighting the grey 'x' button next to the second animal's ID.

To add animals to the cart select the “Cart Options” at the top right of the screen. Select “Add Animals to Cart” and select the grey plus button to add the desired animals into the cart. The cart option also enables you to clear your cart.

The screenshot shows the 'Animal Cart' interface. On the left, a 'Choose an action' menu is open, listing actions like 'Add Animals To Cart', 'Clear Cart', and 'Send to PC'. A red box highlights the 'Add Animals To Cart' option. A red arrow points to the main cart interface. The main cart interface has a '2 Animals in Cart' section with a search bar 'Search Nat. Id. No...'. Below it, three rows of animal details are shown: UK [redacted] 5777, UK [redacted] 00365, and UK [redacted] 3185 7. A red circle highlights the grey plus button next to the first animal's ID.

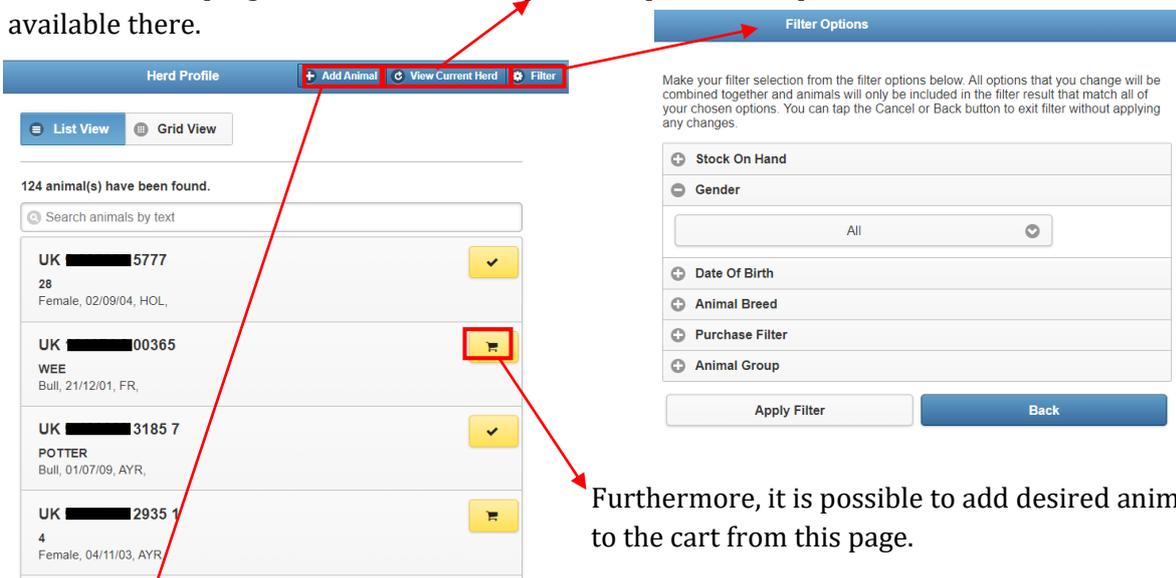

Reports

Selecting the “Reports” option in the navigation menu will display the screen below of multiple herd and management reports.

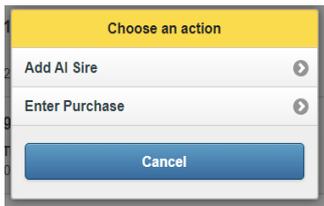

Herd Reports

Selecting the “Herd Profile” option will display a new window with a list of the whole herd, shown below. To filter the herd list by a range of different options e.g. gender, select the “Filter” button at the top right of the screen. An option to update the report with the current herd is also available there.

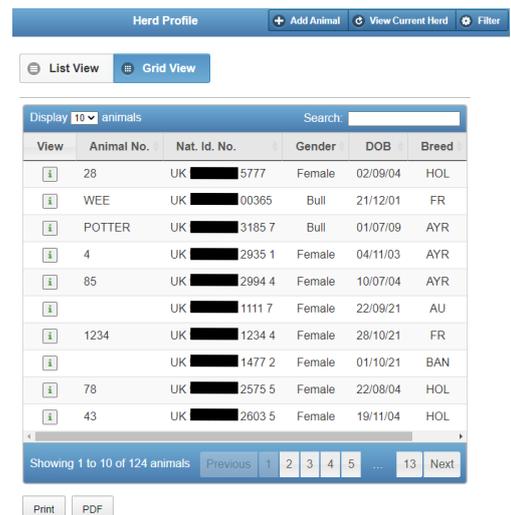

Furthermore, it is possible to add desired animals to the cart from this page.

On the Herd profile report it is also possible to add new animals or an AI sire to the herd by selecting “Add Animal” at the top right of the screen.

Selecting the “Grid View” option enables more details about the herd to be seen. As displayed to the right.

Management Reports

Selecting the “Standard Weight Gain Report” from the management reports displays the page below. Here you can select a specific group of animal’s weight during a certain time period. To create a report for the chosen criteria then select “View Report”. Viewing the standard weight gain report for your selected criteria you can then choose to save it in a range of different formats e.g. Pdf or print the list of animals.

The “Sales Planner” option has the same display as the herd report. The “Sales Planner” window is shown below. In the report you can select on a specific animal to bring up its record card and can add it to the cart through selecting the top right button. Selecting back to the Sales Planner window, it is possible to filter the cows by different criteria displayed below. Furthermore, colour blocks e.g. blue displayed below will be shown to the left of the animal’s number if the age indicator has been set up in the preferences section of the settings described on page 14.

Filter Options

Make your filter selection from the filter options below. All options that you change will be combined together and animals will only be included in the filter result that match all of your chosen options. You can tap the Cancel or Back button to exit filter without applying any changes.

Over 36 Month

Date of Birth: 21 Dec 2001

Age: 238 Mths, 26 Days

Gender: Bull

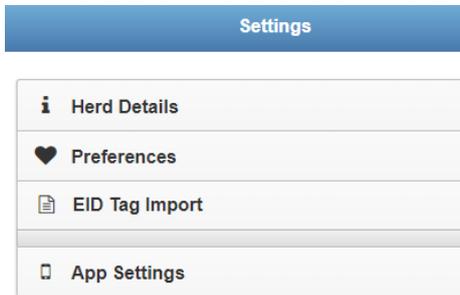

Breed Code: FR

Colour Code: []

Name: WEETON J EMPEROR PI

The “Tasks” and “Animal Cart” options are also able to view from the “Reports” navigation menu.

Settings

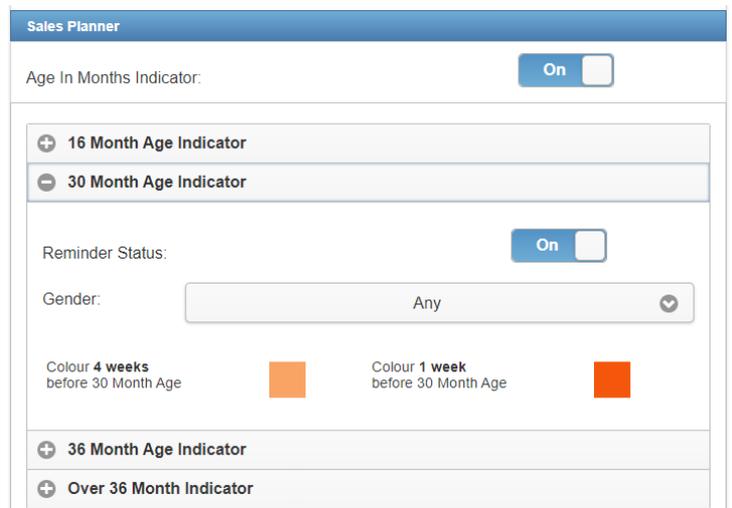

Selecting the “Settings” option in the navigation menu allows you to change your herd details, preferences for the app, EID tag import and app settings.

The tag import option allows cattle EID numbers that have been sent as a document by your EID supplier to be easily uploaded onto the system.

Preferences

Selecting the preferences options will show the sales planner options displayed to the right. Here you can choose to turn on the different ‘Age in month’ indicators. Ensure the first ‘Age In Months Indicator’ has been turned on. Then flick between each different age in months selecting whether or not you would like a reminder for any animals approaching that age. You can also select whether you would like the reminder on for a specific gender of the animal. The different colour codes that represent each animal age are explained in each section as shown to the right.

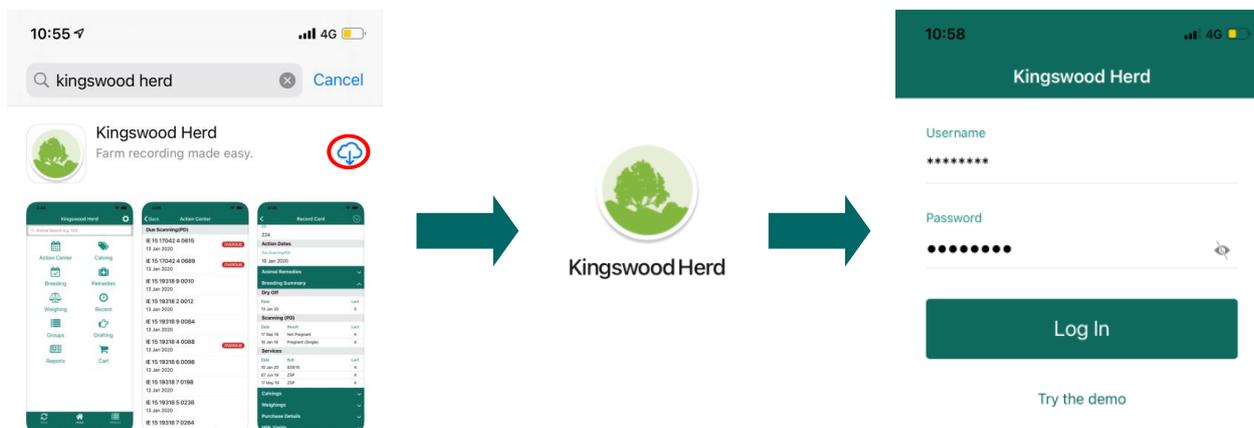

Kingswood Mobile App on Smartphone

Download and Setup App

Open the Apple/Play store in your Apple/Android phone. Then type into the search bar “Kingswood herd” and select search. The Kingswood Herd icon and app preview shown below should appear, hit download.

Find the Kingswood Herd app icon on your phone and open the app. Enter the username and password previously provided to you to log in.

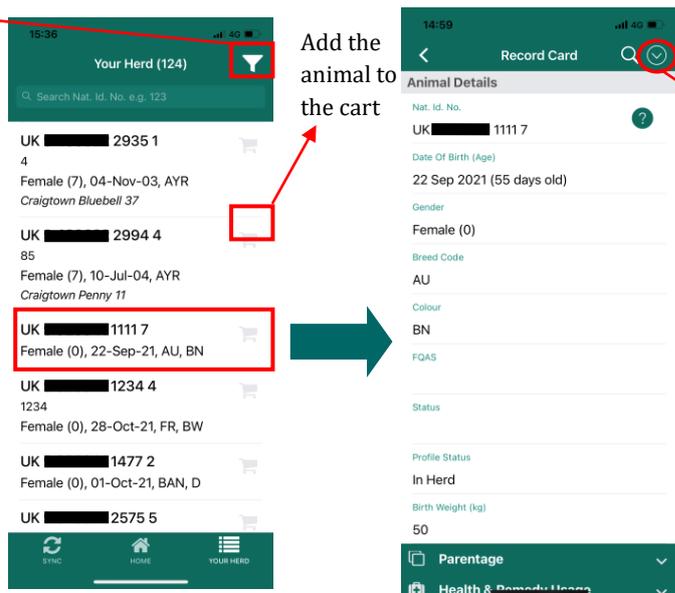

App Layout

Your herd

Selecting the “Your Herd” option at the bottom right of the screen displays the screen below. This contains a list of all the animals in your herd. Enter an animal number in the search bar to search for a particular animal.

The funnel symbol at the top right of the screen also allows you to filter the animals in the herd list by different criteria. Selecting on an animal number will bring up the record card for that particular animal shown below. On the record card selecting the white circle with the down arrow at the top right of the screen will produce a list of actions. This allows you to add e.g. a weight etc to that particular animal. To search for another animal while in the record card of another animal, select the white magnifying glass icon at the top right and type in another animal number or simply select the back arrow at the top right of the screen.

Filter the animals shown in the herd list

Add the animal to the cart

Quick Sync Finished.

Last Sync: 05-10-2021 14:59:45

To download the latest information from the server and other devices tap the 'FULL SYNC' button.

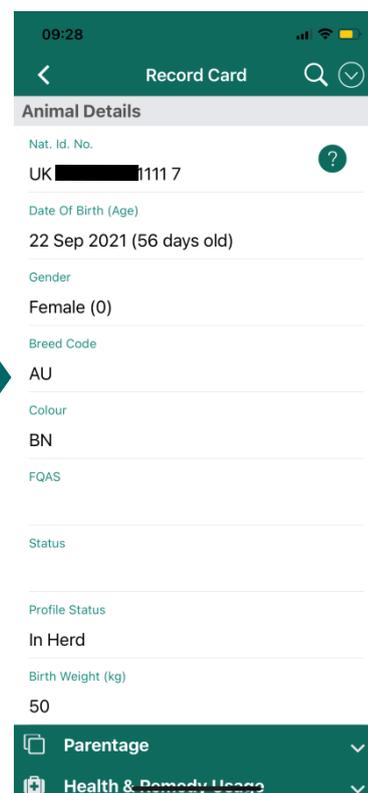

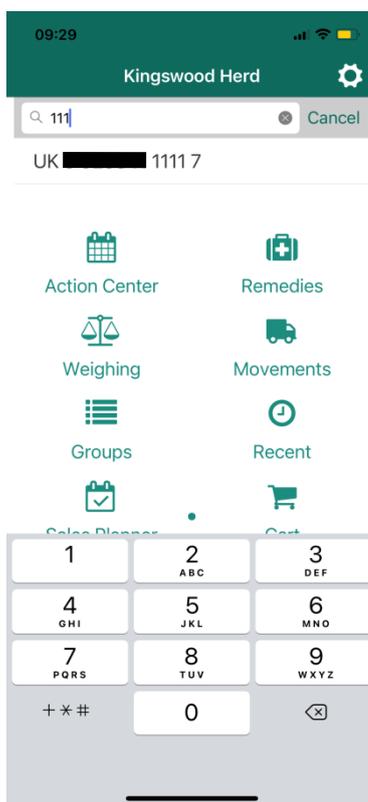

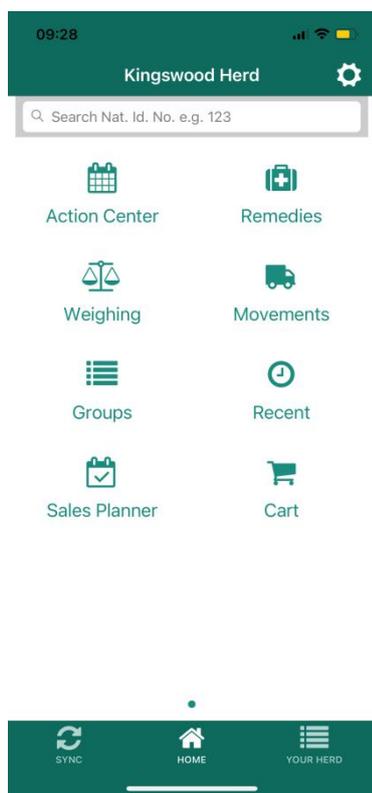

Sync

Selecting the “Sync” option at the bottom left of the screen displays the screen to the right. It is important to sync after changing or entering any data on the app once wifi/signal is gained. This will update your Kingswood account across all devices and programs. Similarly to download any changes made on other devices/programs sync is also important to update the data on your phone. By selecting the bottom left logo your app will automatically sync and display the last sync information. **Before logging out of the account you must sync first.**

Home Page

Once logged in, you will automatically be brought to the home page option. The main home page is the screen shown below. Entering an animal number in the search bar at the top of the screen searches for that particular animal and brings up their record card.

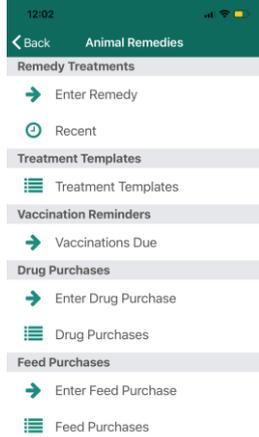

Action Centre

Blank

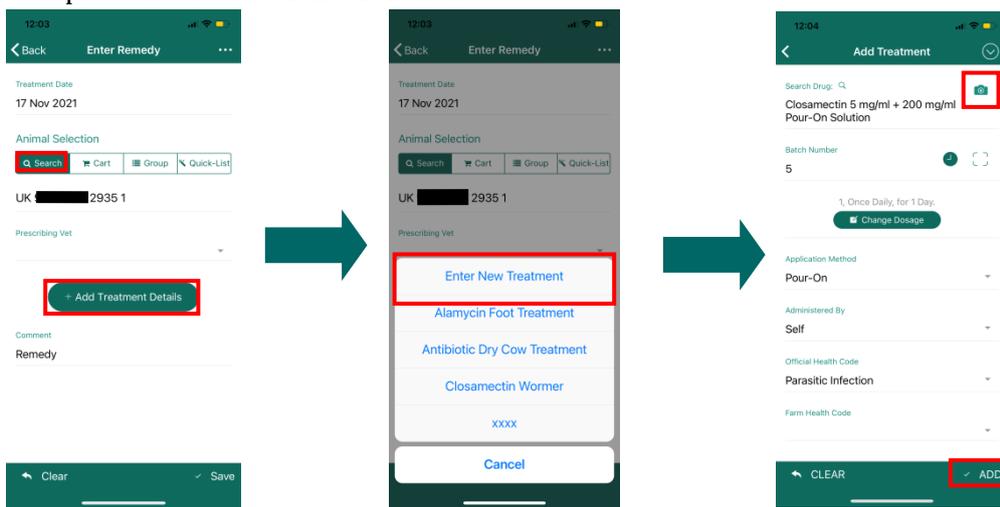

Remedies/Feed

To enter a treatment to a specific/cart/group of animals, select the “Remedies” option in the homepage menu. The screen to the right will be displayed.

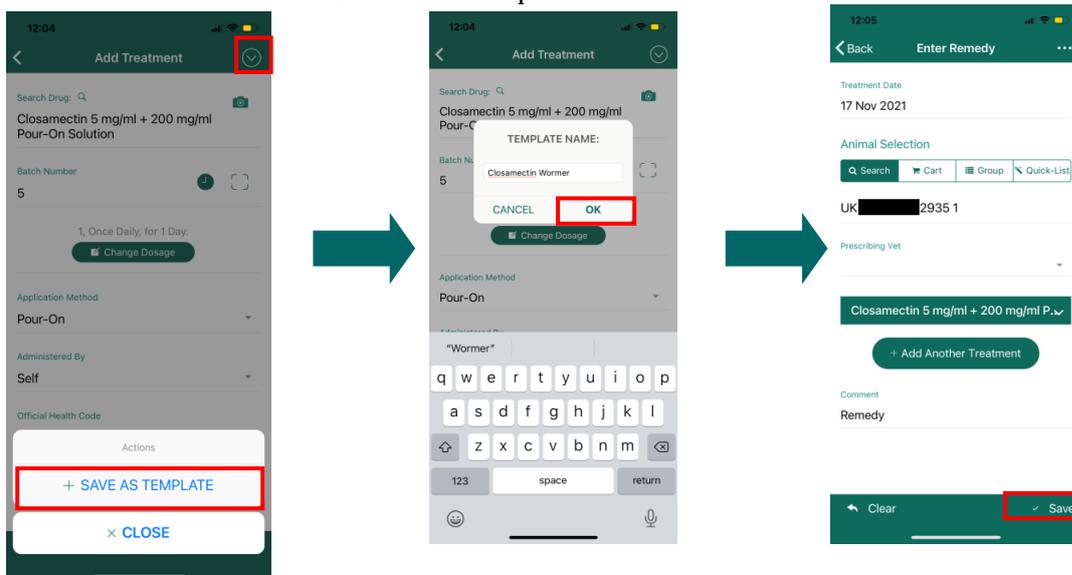

Entering a treatment to 1 animal

Select the “Enter Remedy” option, the screen below will be displayed. Search and select the animal number that the treatment applies to. Select “Add Treatment Details” option and if the treatment is not on your list of saved treatment templates select “Enter New Treatment”. Then fill out the appropriate information on the treatment given including the dosage. It is possible to search for the drug or select the camera icon to take a photo of the drug label which automatically inserts the information of the drug in. Then select “Add” at the bottom right to complete the details of the treatment.

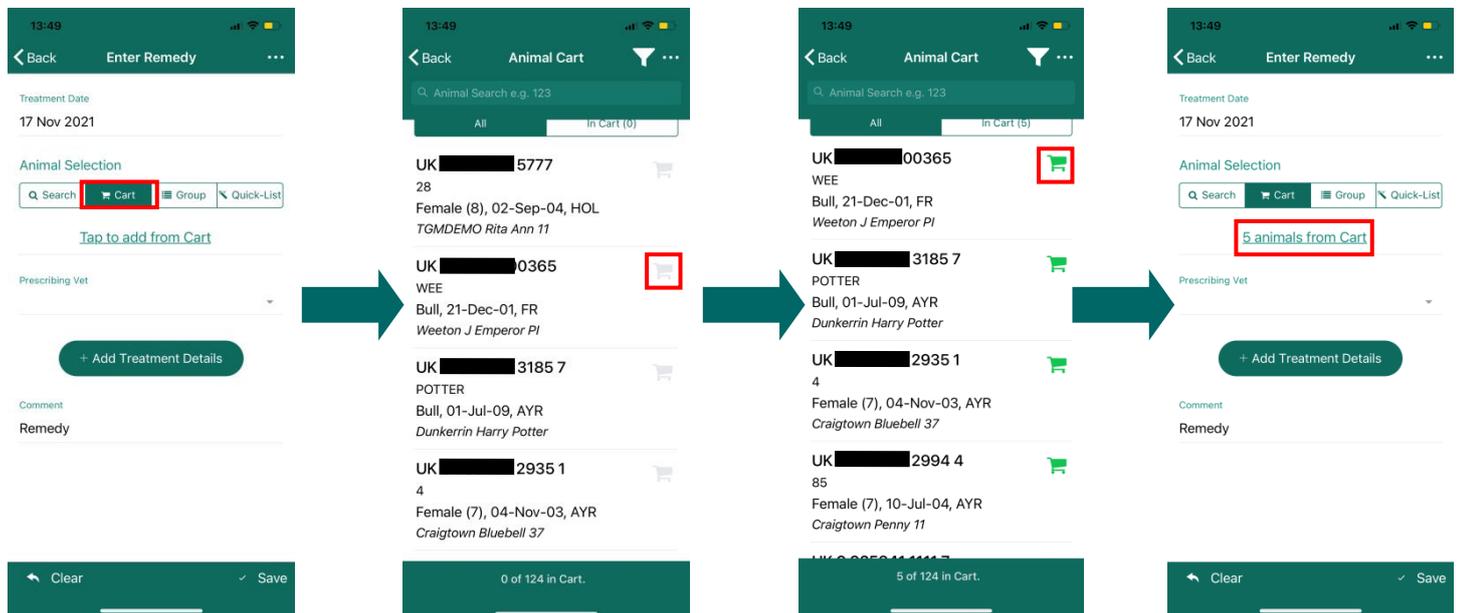

If the treatment being entered to the treatment details is commonly administered in your herd, create a template to allow quicker entry for this treatment for other animals. To do this select the white down arrow in a circle button at the top right of the screen after all the treatment details have been entered. The “Template Name” box will then be displayed, enter a chosen name for this specific treatment. Continue selecting the “Ok” button to create the template until you are back to the “Add Treatment” screen. Once back to the “Treatment Details” box, to finish adding the treatment select the “Add” option. The details and dosage of this treatment is now stored and can be used in future rather than selecting “Enter New Treatment”. If multiple treatments have been added to an animal select “Add Another Treatment” and complete as before. Once all treatments have been completed select “Save”.

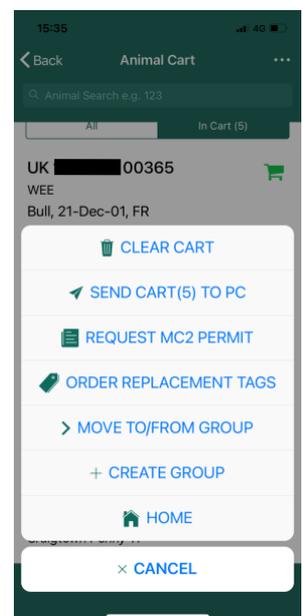

Entering a treatment to multiple animals

To enter a treatment to multiple animals, select the 'Enter Remedy' option. Then select "Cart" and then select the "Tap to add from cart" button. A new page "Animal Cart" will be displayed where it is possible to search for specific cows in the search bar or filter using the funnel symbol at the top right of the screen. Select the shopping cart icon beside the animal number to add it to the cart. When an animal is in the cart the shopping cart icon will be green. To remove an animal from the cart select the green shopping cart icon and it will turn white again when the animal has been removed. To view all animals in the cart, select "In Cart (X)". Once the correct amount of animals are in the cart, select "Back" and then "Save" when finished.

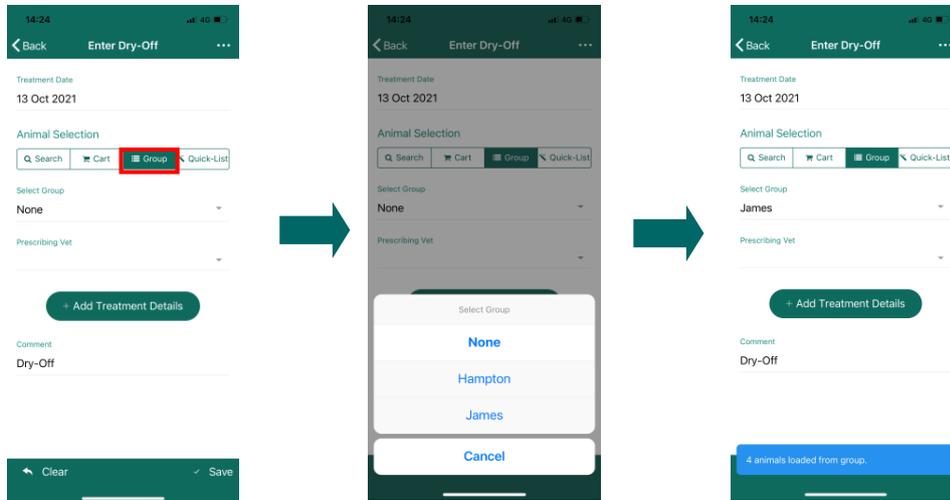

Furthermore, when editing the animals in the cart, selecting the 3 white dots at the top right of the screen will display a list of actions that can be completed against all the animals in the cart. Here it is also possible to clear the animals in the cart. The list is displayed to the right.

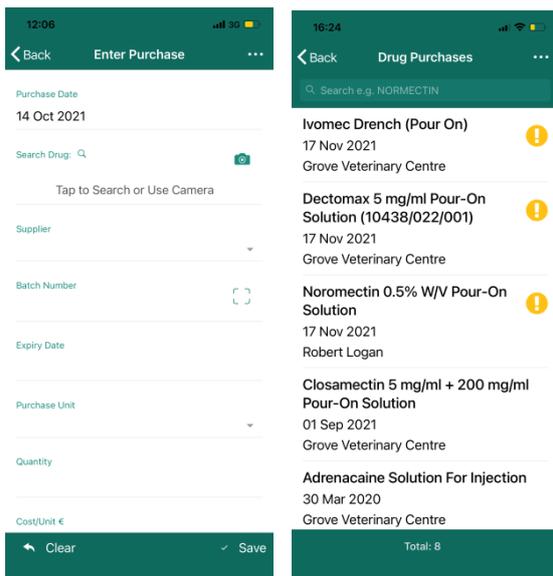

Entering a treatment to a group of animals

To enter a treatment to animals that has previously been placed in a designated group on the software or app (see page 21), select the “Group” version in the “Animal Selection”. Then select the name of group with the intended animals to be treated. Once selected a blue banner at the bottom of the screen should be displayed to inform you how many animals are in this group. Enter the treatment as stated before and then select “Save” at the bottom right of the screen. To edit the cattle in the groups you must select back to the homepage and select “Groups”.

Viewing a recent treatment

To view the recent animals that have had treatment administered, select the “Recent” option under the “Remedy Treatments” section. The screen to the left will be displayed. It is possible to filter the animals by selecting the icon at the top right of the screen.

Enter and View Drug/Feed Purchase

To enter a drug/feed purchase, select “Enter Drug/Feed Purchase” in the Animal Remedies screen. Fill out the appropriate information and select “Save”. Entering a drug purchase has a photo entry option available described at the end of page 17.

To view any drugs or feed purchased on the farm select the “Drug/Feed Purchase” option on the animal remedies screen. The information is presented on a list where it is possible to search for a particular one.

Treatment Templates

To view the list of treatment templates made during remedies, select the "Treatment Templates" option in the animal remedies screen. Here it is possible to view all templates made but not to edit them which is displayed to the left.

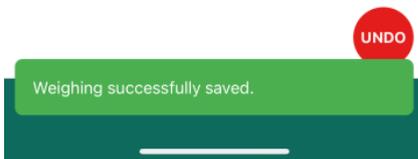

Vaccinations Due

Selecting the "Vaccinations Due" in the animal remedies screen will display a list of vaccination reminders. It is possible to select to view past reminders by pressing the filter icon at the top right of the screen.

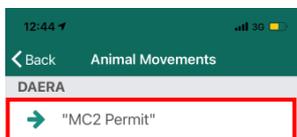

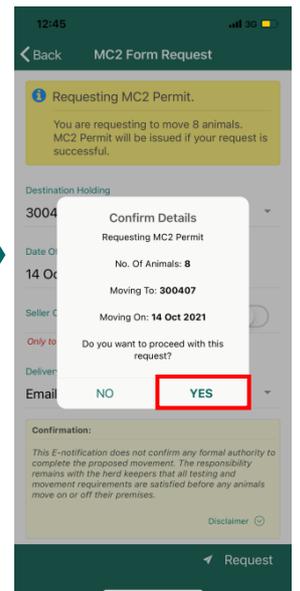

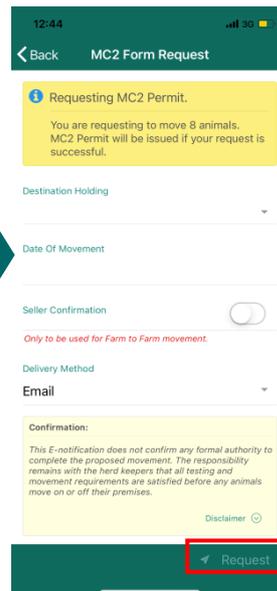

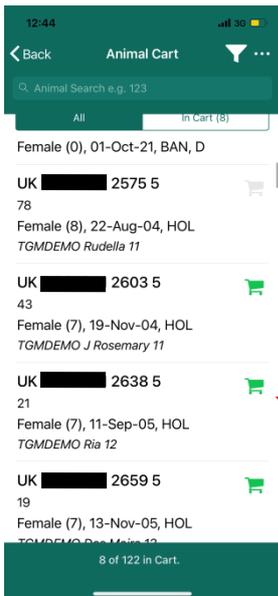

Weighing

To enter weighings for your herd select the "Weighings" option in the homepage menu. Fill out the screen with the appropriate information including the weight in kilograms, displayed to the right and select "Save". Once successfully entered a green banner shown below will be displayed.

Movements

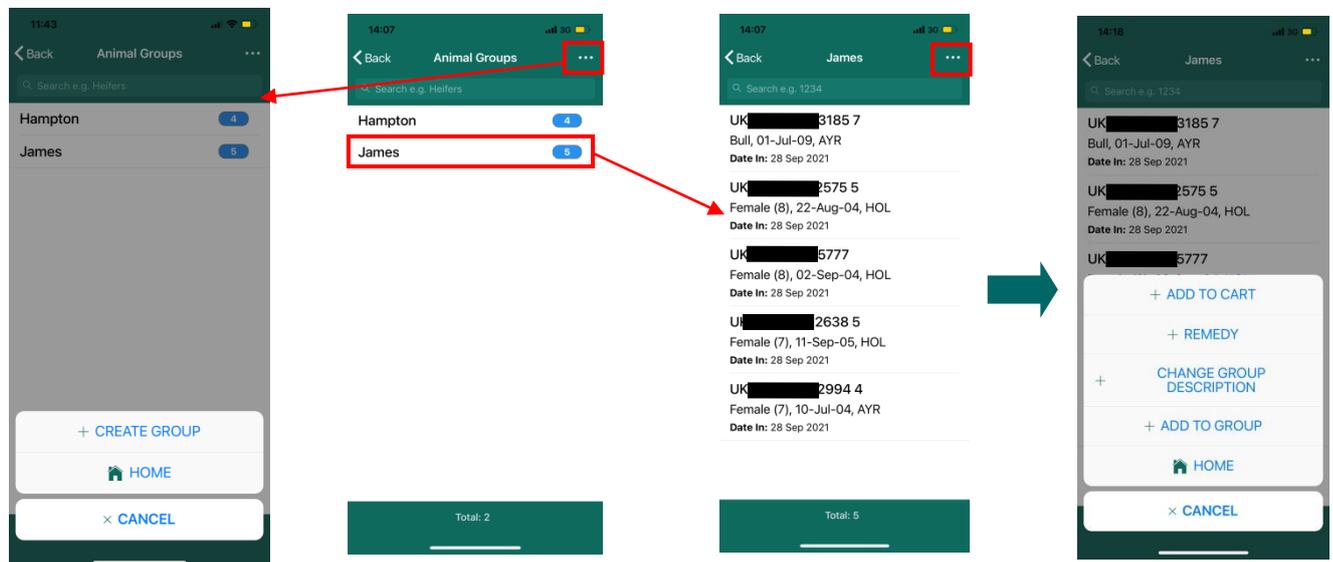

To make an MC2 movement permit, select the "Movements" option in the homepage then click "MC2 Permit". The animals in the cart will appear in the 'Selected section' of the MC2 permit screen. To alter the animals in the cart that are being selected for the movement permit, select the cart symbol at the top right of the screen. Add and remove animals from the cart as stated in page 18 previously. Once the correct animals are in the cart select "Back" out of the animal cart and select "Continue" at the bottom right of the screen. Fill out the appropriate information and select the delivery method then select "Request" and "Yes".

Groups

Groups

Selecting the “Groups” option on the main homepage will display a screen which shows the different premade groups of animals within your herd. Selecting the 3 white dots at the top right of the Animal Groups page will produce the option to add another group. Select back and then clicking on a group will display all the animals within that group where you can search to find a specific animal. Selecting the 3 white dots at the top right of the screen will produce a menu displayed below where you can add animals to the group, add that entire group to the cart or add a remedy to all the animals in that group.

Recent

Recent

Selecting the “Recent” option on the main homepage will display a screen of all the recent events that have been applied to your herd, as displayed to the right. Any actions applied on the app that have not yet been synced will appear with a yellow exclamation mark beside. It is also possible to filter which actions are viewed by selecting the filter option at the top right of the screen.

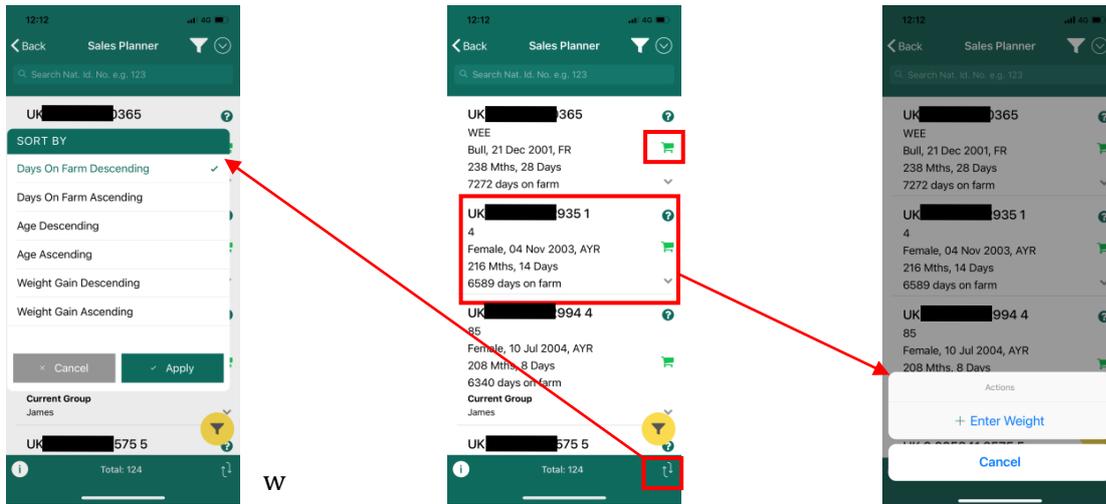

Sales Planner

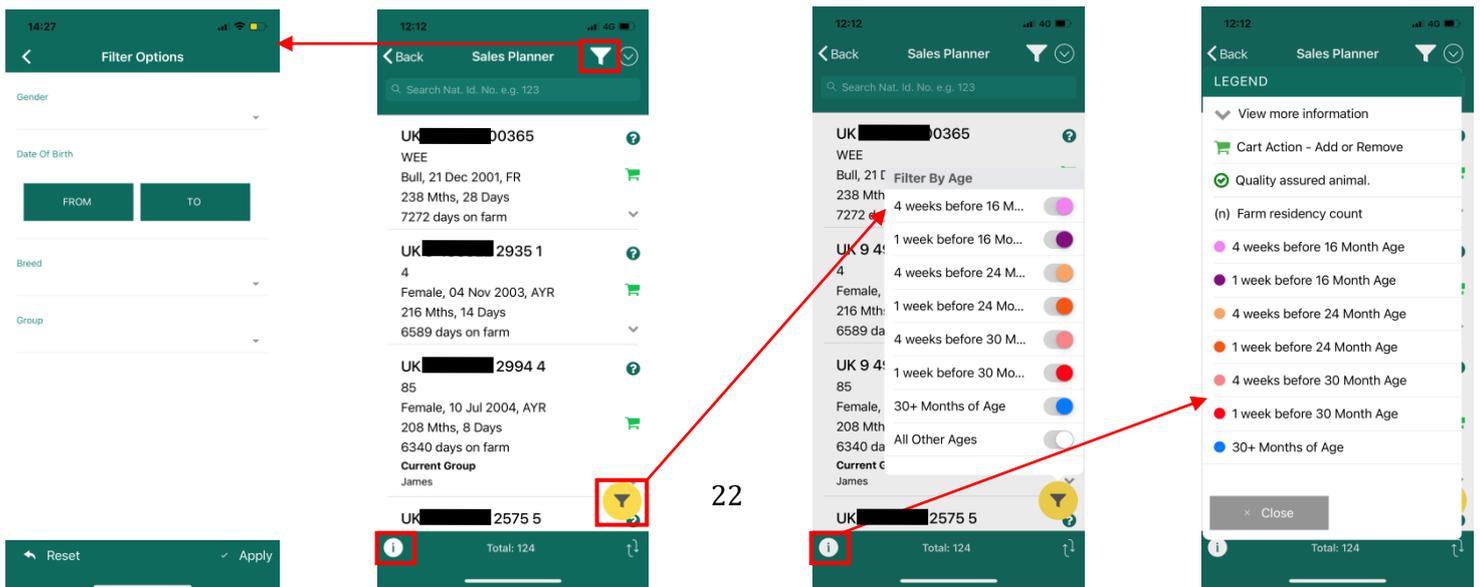

Selecting the “Sales Planner” option in the homepage will display a new page “Sales Planner” which is displayed below. Here you are able to search for specific animals in the search bar or filter the herd by different categories by selecting the white funnel symbol at the top right of the screen. Select the shopping cart icon beside the animal number to add it to the cart. When an animal is in the cart the shopping cart icon will be green. To remove an animal from the cart, select the green shopping cart icon and it will turn white again when the animal has been removed.

Selecting the two white arrows at the bottom right of the Sales Planner will display a ‘sort by’ menu, shown below. This allows you to sort the animals displayed in the Sales Planner by a range of criteria including age, days and weight.

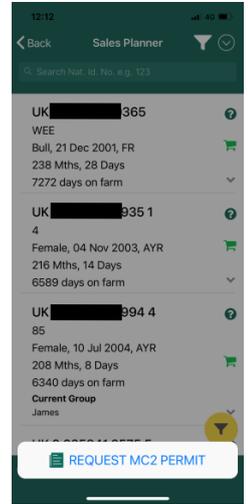

Selecting on a specific animal brings up an action window with the option to enter a weight to that specific animal.

To filter the animals displayed in the Sales Planner by gender, DOB, breed or group select the white funnel symbol at the top right of the screen. To filter by age select the filter symbol in the yellow circle at the bottom right of the screen. A range of filters for different weeks before 16, 24 and 30 months is available to sort the animals in the Sales Planner by. Selecting the ‘i’ in a white circle at the bottom left of the page produces a list of explanations as to what each symbol and colour indicates on the Sale Planner.

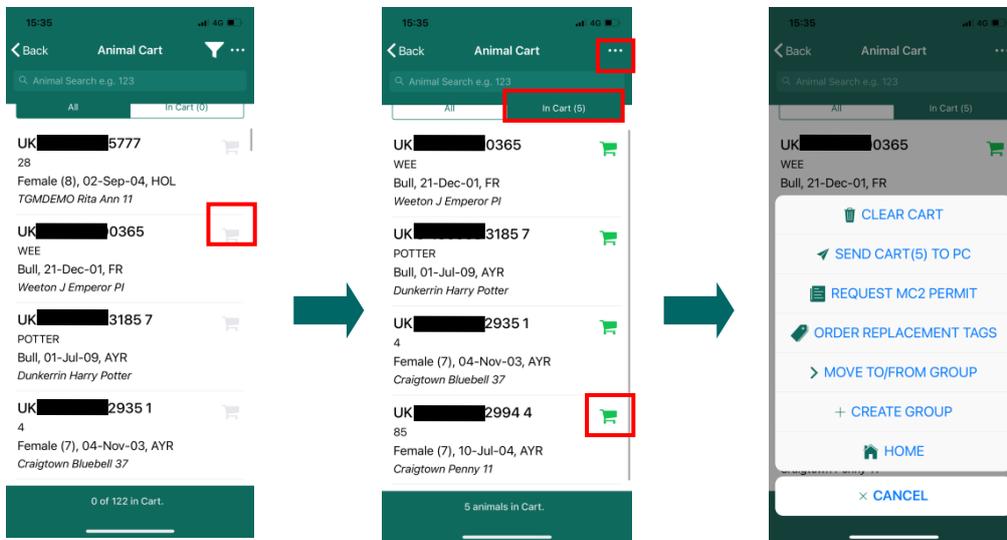

It is also possible to create an MC2 movement form on the Sales Planner page. Select the down arrow in a circle symbol at the top right of the screen. Then follow the procedures on page 20 to create the form.

Cart

Selecting the “Cart” option in the homepage will display a new page “Animal Cart”. Here you are able to search for specific cows in the search bar or filter the herd by different categories by selecting the funnel symbol at the top right of the screen. Select the shopping cart icon beside the animal number to add it to the cart. When an animal is in the cart the shopping cart icon will be green. To remove an animal from the cart, select the green shopping cart icon and it will turn white again when the animal has been removed. To view all animals in the cart, select “In Cart (X)”. Select the 3 white dots at the top right of the screen when on the “In Cart” option. A list of actions that can be completed against all the animals in the cart will be displayed, shown below.

Settings

To get into the apps settings, go to the home page and select the white cog at the top right of the screen. The settings menu will be shown, displayed below. Here you are able change your preferences for the app, view your herd and account details and link your account to Cormac Tagging.

Logging out of your account

To log out of your account, select the settings option in the home page, select account and select the symbol at the top right of the screen. This will display the option to log out. **Ensure you have synced your data before selecting the log out button.** It is not necessary to log out of the app after each use.
