Introduction

You can download the Kingswood herd app onto your Apple or Android smart phone. Additionally you can log into the Kingswood herd mobile app platform on the internet using a range of devices such as; Smartphone, Windows computers and tablets, Macbook, iPad etc. This can be found at the web address <https://www.kingswoodfarm.ie>.

You are entitled to use both app methods on as many devices as you want.

There are different versions of the Kingswood herd app depending on your cattle system e.g. dairy or beef etc.

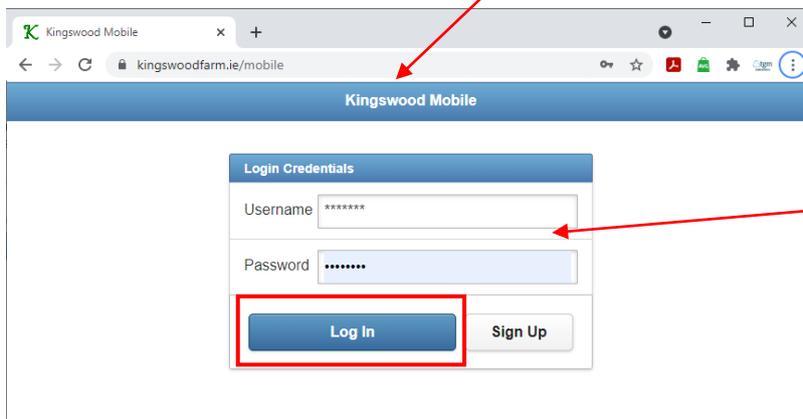

Kingswood will send you an email with your login credentials. Your username will be your herd number. Your password will be a 7 character combination of letters and numbers.

Kingswood Herd App Internet Platform

Open up the browser such as Google Chrome or Firefox etc on your chosen device and type into the address bar “<https://www.kingswoodfarm.ie>”.

The image to the left is what will appear once the web address is entered. Enter your username and password in the appropriate boxes and log in.

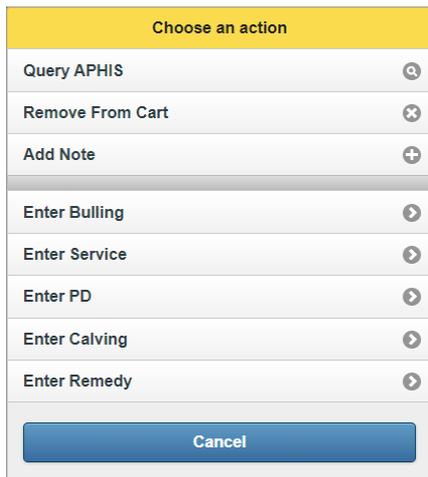

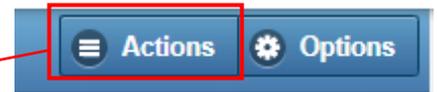

Home Page

The home page will be displayed once you have successfully logged into the online Kingswood Herd app shown below. The main navigation options will appear on the left hand side of the screen. On the home page you can search for specific animals within your herd, entering the animal’s number in the search bar provided.

Once an animal no. has been entered all the details of that specific animal is shown, demonstrated in the image on the right.

Click on the plus symbols to obtain more information for that section.

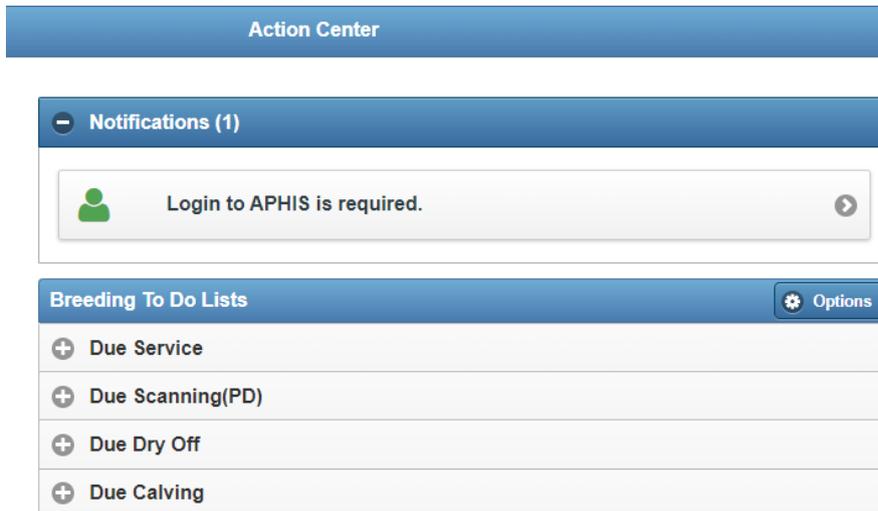

Selecting the “Actions” button at the top right of the screen after searching for a specific cow will bring up the following menu:

Then select an option from the menu to add a chosen action from the list to that specific cow.

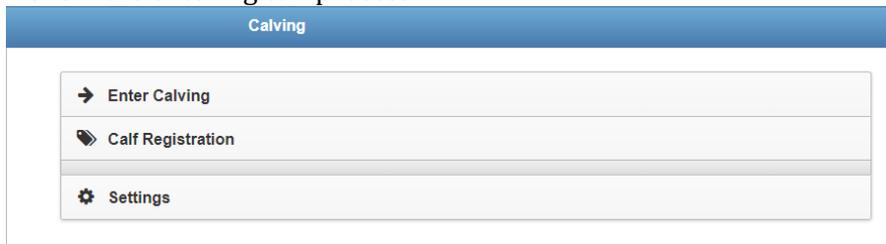

Action Centre

After selecting the “Action Centre” on the navigation menu, the screen below will be shown. It is important to make sure that Aphis has been logged into before registering calves. Select the “Login to APHIS is required” option and it will redirect you onto the DAERA log in where you select “GG Sign in/register” under the Government Gateway. Once the login has been completed on Aphis, it will redirect you back to the Kingswood Herd app browser page.

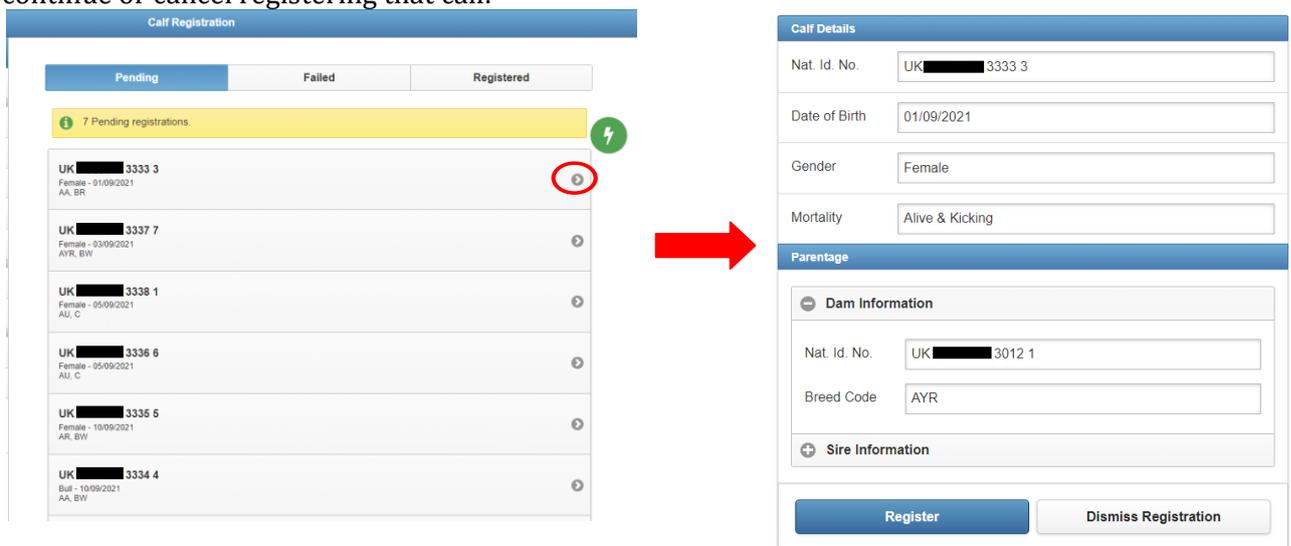

Calving

When the “Calving” button is selected on the navigation menu the screen below will appear. To record a birth you select the “Enter Calving” option, ensure that Aphis has been logged into and follow the entering calf process.

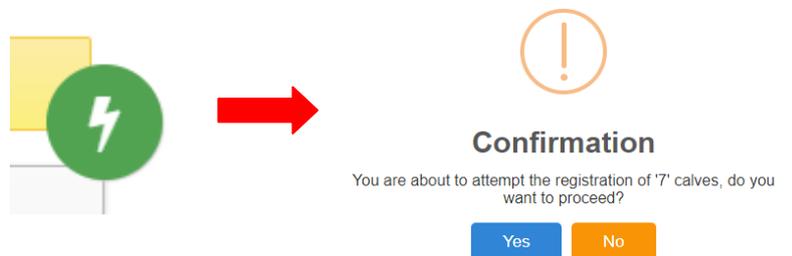

Selecting the “Calf Registration” option will show the screen below. The calves registered, failed and pending are shown through clicking on each option. An update on the most recent activity of the calves will appear in a banner at the top of the screen. Selecting a calf from the pending menu by clicking on the grey arrow will show you the calf’s details and whether to edit, continue or cancel registering that calf.

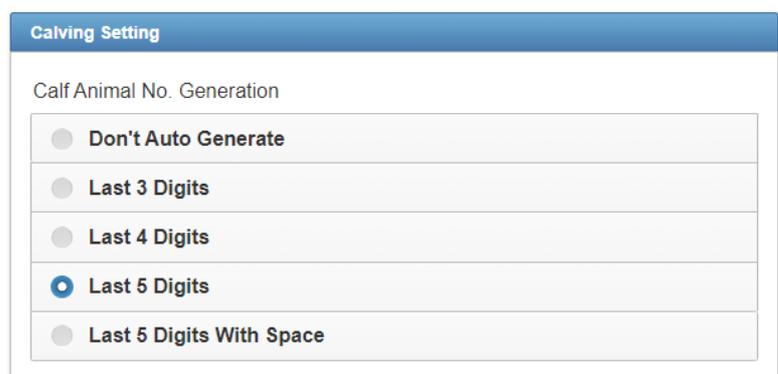

If the notification is that the calves are still pending click the green circle containing a lightning bolt and the confirmation warning below will appear.

If you wish to proceed registering all calves that are shown on the pending list select yes. If not, select no and remove any calves that you do not wish to register.

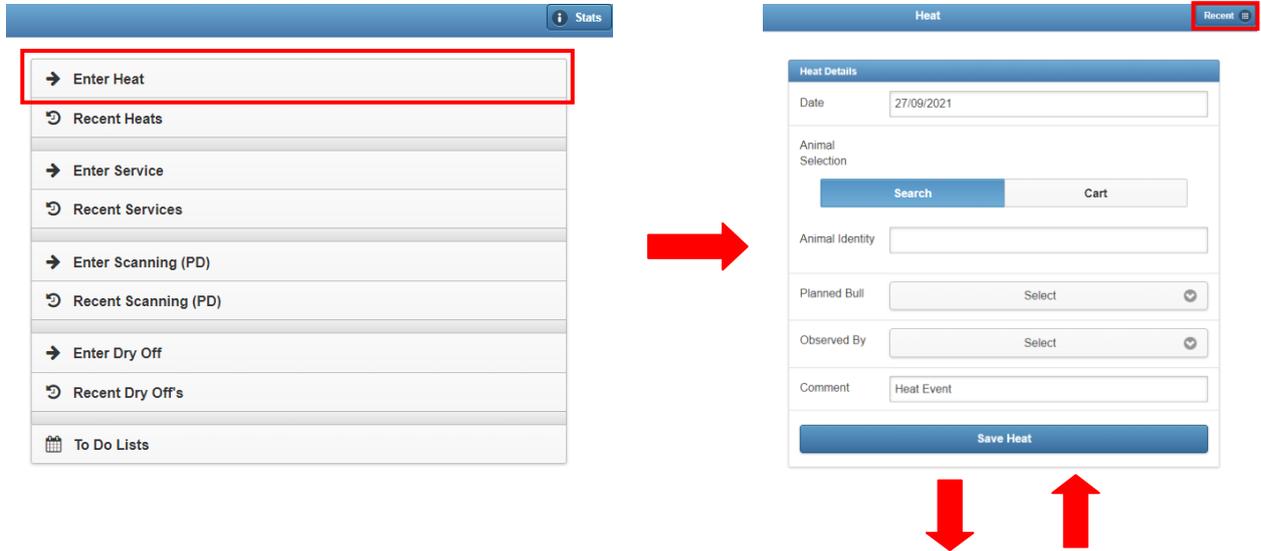

The “Settings” option on the calving screen allows you to adjust the automatic generation of the calf’s animal number as shown to the right:

Breeding

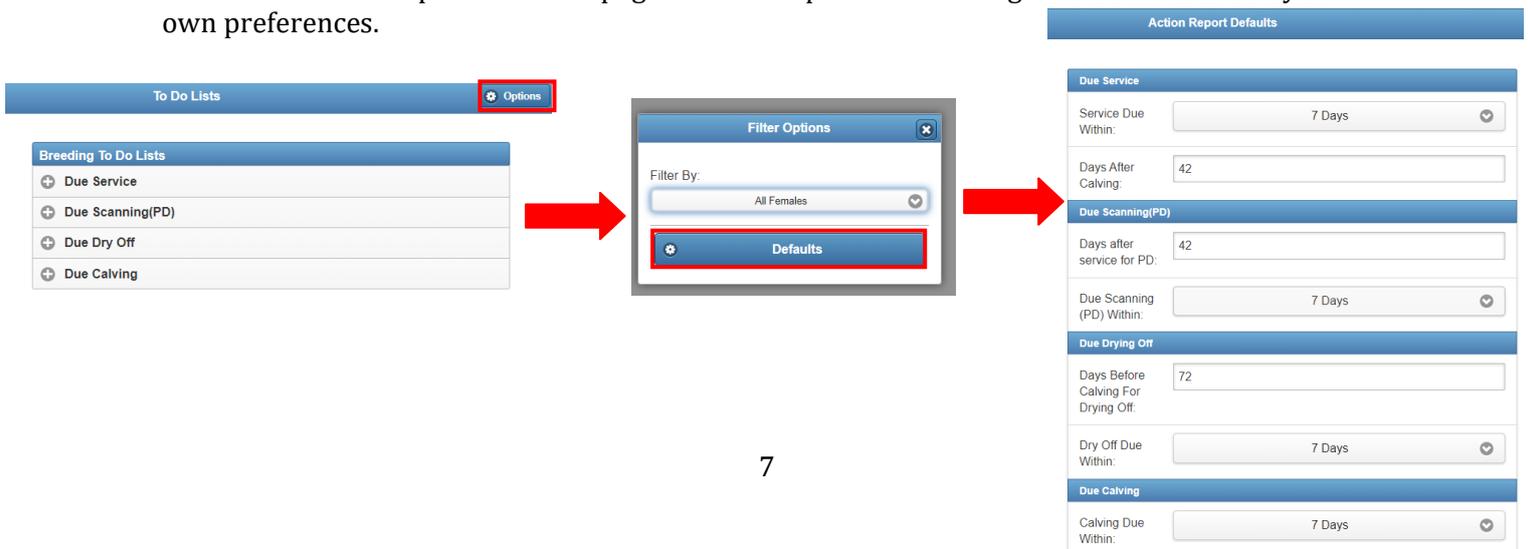

When the “Breeding” button is selected on the navigation menu the screen below will be displayed. You can enter a heat, service, scanning and dry off of a cow by selecting the appropriate option. This page also allows you to see the recent heats, services, scanning and drying off’s of cattle within your herd. After selecting an enter option for example “Enter Heat” the screen below is displayed. Enter heat details for a singular animal through filling in its Animal Identity. To fill in a breeding event for multiple animals select the cart (see page 9 for instructions on how to work the cart).

The “Recent” button at the top right of the screen will then allow you to switch to the “Recent Heats” page without going back to the main navigation breeding page as shown to the right. At the top right of the “Recent Heats” page the option “Enter” is available to bring you back to the “Enter heat” page. This is the same for the service, scanning and drying off pages.

Date	Animal Identity	Bull
14/12/17	UK [REDACTED] 2829 7	
14/12/17	UK [REDACTED] 2958 3	TRY
10/12/15	UK [REDACTED] 2958 3	
11/12/14	UK [REDACTED] 2958 3	TRY
07/10/14	UK [REDACTED] 2958 3	BBL
18/06/14	UK [REDACTED] 2749 4	TRY
18/06/14	UK [REDACTED] 2829 7	TRY
06/02/14	UK [REDACTED] 3068 1	
06/02/14	UK [REDACTED] 3072 5	
06/02/14	UK [REDACTED] 3075 1	

Selecting the “To Do Lists” option on the breeding page will show the page below. Clicking on the grey plus buttons will show the cattle that are due for service, scanning, dry off and calving. Selecting the “Options” button at the top right of the screen will bring up filter options which enables the cattle to be searched by different desired filters. Selecting the “Defaults” button will show an “Actions Report Defaults” page where it is possible to change the defaults to suit your own preferences.

Finally, the “Stats” button at the top right of the breeding page will show a summary of the herds breeding statistics displayed as “Breeding Stats” shown below.

The screenshot shows a navigation menu with the following items:

- Enter Heat
- ↻ Recent Heats
- Enter Service
- ↻ Recent Services
- Enter Scanning (PD)
- ↻ Recent Scanning (PD)
- Enter Dry Off
- ↻ Recent Dry Off's
- 📅 To Do Lists

The "Stats" button is located at the top right of the menu and is highlighted with a red box.

The Breeding Stats page displays the following data:

- Cow Serves:** 0/63 Cows Served, 0 Cows Serves To Date, 0.00 Serves Per Cow
- Heifer Serves:** 0/39 Heifers Served, 0 Heifer Serves To Date, 0.00 Serves Per Heifer
- Cow Heats:** 0/63 Cows Observed In Heat, 0 Cow Heats To Date, 0.00 Heats Per Cow
- Heifer Heats:** 0/39 Heifers Observed In Heat

Animal Remedies / Feeds

Adding a Treatment to 1 Specific Animal

When the “Animal Remedies” button is selected on the navigation menu the screen displayed below will be displayed. Selecting the “Enter Remedy Event” will bring up a “Remedy Event” page. An animal that has been treated can be searched in the “Animal Identity” box and the treatment that was given to that specific animal can be added by selecting the “Add Treatment” button.

The Animal Remedies/Feeds page contains the following menu items:

- Enter Remedy Event
- ↻ Recent Remedy Events
- 📅 Repeat Treatments
- 📄 Treatment Templates
- 💰 Enter Drug Purchase
- Enter Feed Purchase
- ⚙️ Settings

The "Enter Remedy Event" button is highlighted with a red box.

The Remedy Event page includes the following fields and buttons:

- Remedy Details:** Date (27/09/2021), Prescribing Vet (Select), Animal Selection (Search, Cart, Herd), Animal Identity (UK 9 925841 3338 1)
- Treatments:** Add Treatment (highlighted in red)
- Comment:** Remedy Event
- Save Remedy Event** button

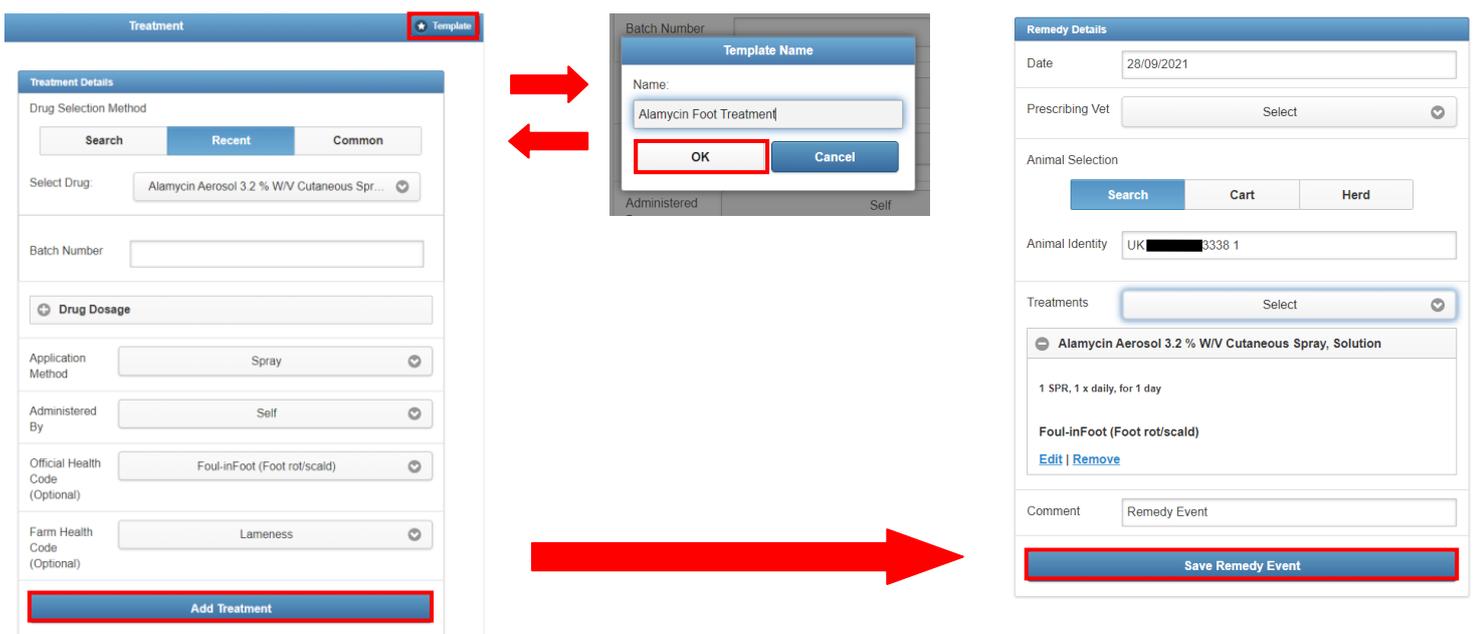

The Treatment page includes the following fields and buttons:

- Treatment Details:** Drug Selection Method (Search, Recent, Common), Type first few letters... (input field), Application Method (Select), Administered By (Self), Official Health Code (Optional) (Select), Farm Health Code (Optional) (Select)
- Add Treatment** button

The “Treatment Details” box displayed to the right will appear. If the “Search” button is selected you can enter all the details of the treatment administered to that animal and the reason for administration. Selecting the “Recent” option will allow you to search a selection of recently searched and administered treatments. Selecting the “Common” button will allow you to select from a list of commonly selected treatments administered in your herd.

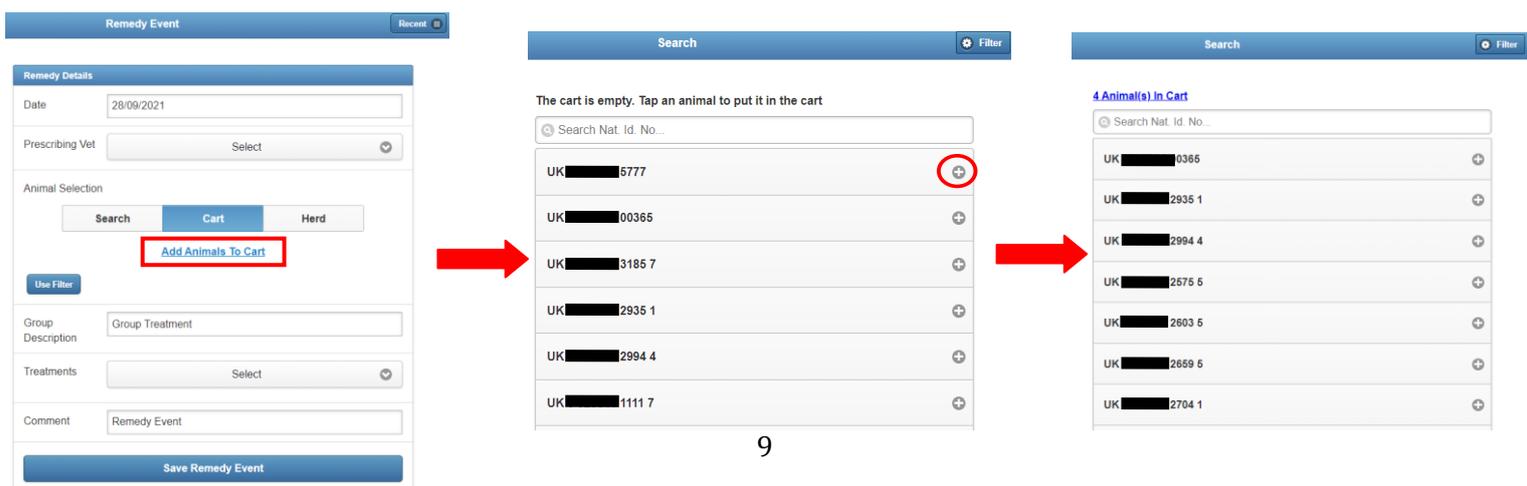

If the treatment being entered to the treatment details is commonly administered in your herd, create a template to allow quicker entry for this specific treatment for other animals. To do this select the “Template” button at the top right of the screen after all the treatment details have been entered. The “Template Name” box will then be displayed, enter a chosen name for this specific treatment. Continue selecting the “Ok” button to create the template until you are back to the “Treatment details” box. Once back to the “Treatment Details” box, to finish adding the treatment select the “Add Treatment” option.

If you do not wish to add this treatment to a template if it is not commonly administered, skip the template step and go straight to the “Add Treatment” button. This will then show the “Remedy Details” with the chosen animal and treatment added. If you wish to add another treatment to the same animal you can select “Treatments” and then “Add Another”. Once finished, the treatments added will appear in a list which is demonstrated below. Select the “Save Remedy Events” to complete the addition of a treatment to that specific animal.

Adding Treatments to Multiple Animals

Entering a treatment to multiple animals follows the same process as before. However, the “Cart” option must be selected in the “Animal Selection” option. If your cart is empty, select the “Add Animals To Cart” option to add the animals that all received the same treatment. Your herd list will be brought up and it is possible to search and filter for specific animals. Clicking on the grey plus button adds the desired animals to the cart.

To remove or view the animals that have been added to the cart for treatment select the “X Animal(s) in Cart” option that is displayed in blue underline. The screen to the right will then be shown to check the correct animals are in the cart for administration of the treatment. Delete animals that should not be in the cart for treatment with the grey x button.

4 Animals in Cart

Find Nat. Id. No...	
UK [REDACTED] 5777	
UK [REDACTED] 3185 7	
UK [REDACTED] 1111 7	
UK [REDACTED] 2638 5	

Then select the “Back” button at the top left of the screen until you are brought back to the original “Remedy Details” page. Continue with the addition of a treatment as stated in the section before. Finally select the “Save Remedy Event” button to complete the addition of the treatment to the selected animals.

Adding Treatments to the Whole Herd

Finally, entering a treatment to the whole herd follows the same process as before. However, in the “Remedy Details” page click the “Herd” option for the “Animal Selection” box shown to the right. Enter your treatment as described before and select “Save Remedy Event”. This will automatically update the whole herd’s treatment details.

Navigating the Rest of Animal Remedies/Feed

Animal Remedies/Feeds
Enter Remedy Event
Recent Remedy Events
Repeat Treatments
Treatment Templates
Enter Drug Purchase
Enter Feed Purchase
Settings

Within the “Animal Remedies/Feed” page it is also possible to view the most recent remedy events that have been entered. The top right button lets you navigate between the entering and viewing recent remedy events. It is also possible to enter drugs and feed purchased in this section. The “Treatment Templates” is where the templates previously made are stored and can be deleted if no longer applicable.

Weighings

When the “Weighing” option in the navigation menu is selected the screen below will be displayed. The page enables you to enter the weight of a specific animal within your herd. The purchase information can be viewed for the particular animal entered into the animal identity by selecting the “Purchase Information” button in the top right corner. Selecting the “Recent” button in the top right corner will produce a list of the cows that had a weight entered recently, displayed below. Selecting the “Enter” button at the top right of this page will bring the “Enter weighing” page back again.

The screenshot shows the 'Weighing' page. On the left is the 'Weighing Details' form with fields for Date (27/09/2021), Animal Identity, Weight (kgs), and Comment (Weighing Event), and a 'Save Weighing' button. On the right is the 'Recent Weighings' table with columns for Date, Nat Id., and Weight (kgs). A 'Recent' button is in the top right of the weighing form, and an 'Enter' button is in the top right of the 'Recent Weighings' table. Red arrows indicate the flow from the weighing form to the recent weighings table and back.

Date	Nat Id.	Weight (kgs)
22/09/21	UK [redacted] 1111 7	50
10/09/21	UK [redacted] 3334 4	50
10/09/21	UK [redacted] 3335 5	50
05/09/21	UK [redacted] 3336 6	50
05/09/21	UK [redacted] 3338 1	50
03/09/21	UK [redacted] 3337 7	50
01/09/21	UK [redacted] 3333 3	50
02/04/20	UK [redacted] 3698 4	50
17/05/18	UK [redacted] 2829 7	250
21/03/17	UK [redacted] 5777	123

Movements

When the “Movements” button is selected on the navigation menu the screen below will be displayed allowing recent purchases, sales and deaths to be viewed and recorded. If the enter option has been selected, for example a purchase, an “Animal Purchase” page will be brought up to enter all the details of the purchase. Select the “Recent” button at the top right of the screen to then display the recent purchases and vice versa as displayed below. This is the same for the sales and deaths pages as well.

The screenshot shows the 'Movements' page. On the left is a menu with options: Enter Purchase, Recent Purchases, Enter Sale, Recent Sales, Record Death, Recent Deaths, and MC2 Movement Notification. The 'Enter Purchase' option is highlighted. A red arrow points to the 'Animal Purchase' form, which has fields for Event Date (28/09/2021), Supplier, Buyer, Add Animals, and Comment (Purchase Event), and a 'Save Purchase' button. Another red arrow points to the 'Recent Purchases' table, which has columns for Date, Animal Identity, and Supplier. A 'Recent' button is in the top right of the purchase form, and an 'Enter' button is in the top right of the 'Recent Purchases' table.

Date	Animal Identity	Supplier
18/10/16	[redacted]	E L Gillen

Selecting the “MC2 Movement Notification” will display the screen on the right. Here you can authorize to request a form for the movement of animals in your cart to another customer. To edit the animals for the movement ensure the correct animals are selected in the cart. To do so select the “Edit Cart” option at the top right of the screen and delete or add animals as required. Ensure you have logged into Aphis in the action centre section before completing this request.

The screenshot shows the 'MC2 Movement Notification' page. It has an 'Edit Cart' button in the top right. The form includes fields for Customer (Select), Date of Movement (29/09/2021), and a section for '3 animals to be listed on form'. There is a 'Confirmation' section with a disclaimer and a 'Request Movement Form' button at the bottom.

Search Animal Record Card

To search for an animal record card in the herd, select the “Search Animal Record Card” in the navigation menu. The screen below will be displayed and enter the specific animal number into the “Animal identity” box. The page will then bring up the record card of that animal. The “Actions” button at the top right of the screen allows you to add a range of actions to that animal. The “Options” button allows you choose between searching the current herd profile or all animals.

The image shows a sequence of three screenshots illustrating the search process. The first screenshot shows the 'Record Card' search screen with an 'Animal Identity' input field. A red arrow points to the second screenshot, which shows the search results for animal 3077, including fields for Animal No., Date of Birth, Gender, Breed Code, Lact No., Colour Code, Name, and Status. A red box highlights the 'Actions' and 'Options' buttons at the top right. A red arrow points from the 'Options' button to a third screenshot showing a 'Choose an action' menu with options like 'Query APHIS', 'Add To Cart', 'Add Note', 'Enter Bulling', 'Enter Service', 'Enter PD', 'Enter Calving', and 'Enter Remedy'. Another red arrow points from the 'Options' button to a fourth screenshot showing 'Search Options' with radio buttons for 'Search Current Profile' (selected) and 'Search All Animals'.

Animal Cart

Selecting the “Animal Cart” option in the navigation menu allows the animals that are currently in the cart to be viewed which is shown below. Before completing an action related to the cart it is important to remove or add the correct animals. To remove an animal from the cart select the grey x beside their ID or search the animal number in the search bar if there are numerous animals in the cart.

The image shows the 'Animal Cart' interface. At the top, it says '2 Animals in Cart'. Below this is a search bar with the text 'Find Nat. Id. No...'. Two animal records are listed: 'UK [redacted] 1111 7' and 'UK [redacted] 2638 5'. A red circle highlights the grey 'x' button next to the first animal's ID. To the right, the text 'OR' is shown, followed by another search bar containing '1111' and a red circle around the grey 'x' button. Below this search bar, the animal record 'UK [redacted] 1111 7' is shown with a grey 'x' button next to its ID.

To add animals to the cart select the “Cart Options” at the top right of the screen. Select “Add Animals to Cart” and select the grey plus button to add the desired animals into the cart. The cart option also enables you to clear your cart.

The image shows the 'Cart Options' menu on the left, with a red box around the 'Add Animals To Cart' option. A red arrow points to the right, where the 'Animal Cart' interface is shown. The search bar contains 'Search Nat. Id. No...'. Three animal records are listed: 'UK [redacted] 5777', 'UK [redacted] 00365', and 'UK [redacted] 3185 7'. A red circle highlights the grey plus button next to the first animal's ID.

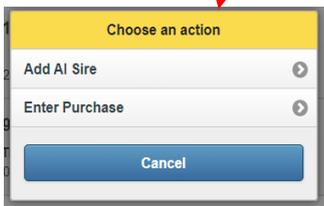

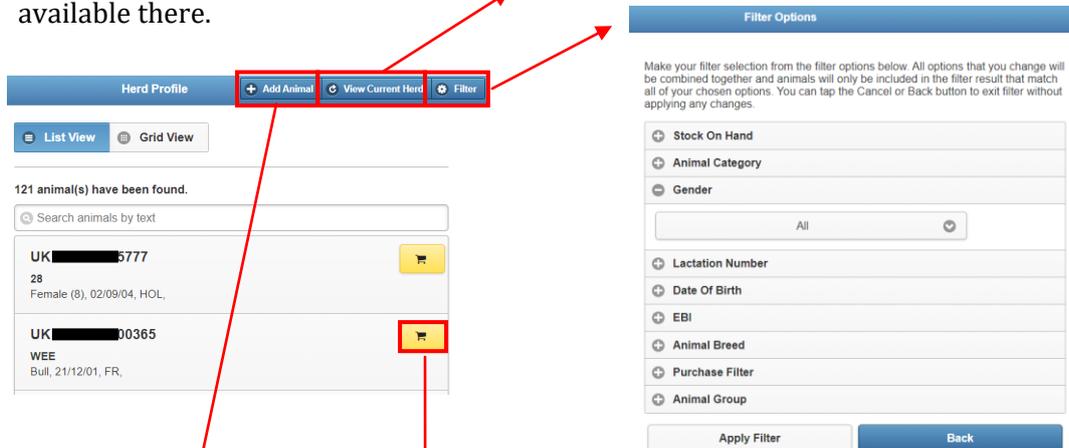

Reports

Selecting the “Reports” option in the navigation menu will display the screen below of multiple herd, breeding and management reports.

Herd Reports

Selecting the “Herd Profile” option will display a new window with a list of the whole herd shown below. To filter the herd list by a range of different options e.g. gender, select the “Filter” button at the top right of the screen. An option to update the report with the current herd is also available there.

Furthermore, it is possible to add desired animals to the cart from this page.

On the Herd profile report it also possible to add new animals or an AI sire to the herd by selecting “Add Animal” at the top right of the screen.

Selecting the “Grid View” option enables more details about the herd to be seen. As displayed to the right.

View	Animal No.	Nat. Id. No.	Gender	DOB	Lact.	Breed	Cart	Dam	Sire
	28	UK [redacted] 5777	Female	02/09/04	8	HOL		37/07	WEE

	19	UK [redacted] 2659 5	Female	13/11/05	7	HOL		74/11	DOS

Breeding Reports

To view the breeding reports of your herd select the “Breeding Animals” option which will display a list of all the breeding animals. The breeding animal’s page has the same filter, view current herd and add to cart options as the herd report section. The grey arrow allows all the breeding information for the selected animal to be shown as displayed below.

The “Breeding Due To List” option on the reports page displays the animals due to be served, scanned, dried off and calved within certain time frames. The breeding statistics of the herd is available in the “Breeding Stats” section.

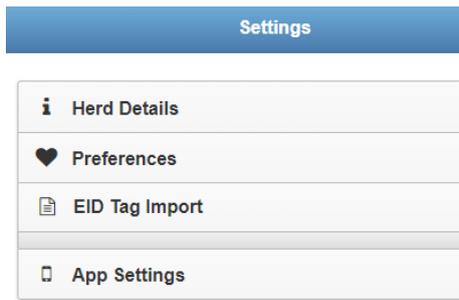

Management Reports

Selecting the “Standard Weight Gain Report” from the management reports displays the page below to the left. Here you can select a specific group of animal’s weight during a certain time period. To create a report for the chosen criteria then select “View Report”.

The “Sales Planner” option has the same display as the herd and breeding reports. In the report you are also able to add animals to the cart that you wish to sell. The “Sales Planner” window is displayed at the bottom right.

The “Tasks” and “Animal Cart” options are also able to view from the “Reports” navigation menu.

Settings

Selecting the “Settings” option in the navigation menu allows you to change your herd details, preferences for the app, EID tag import and app settings.

The tag import option allows cattle EID numbers that have been sent as a document by your EID supplier to be easily uploaded onto the system.

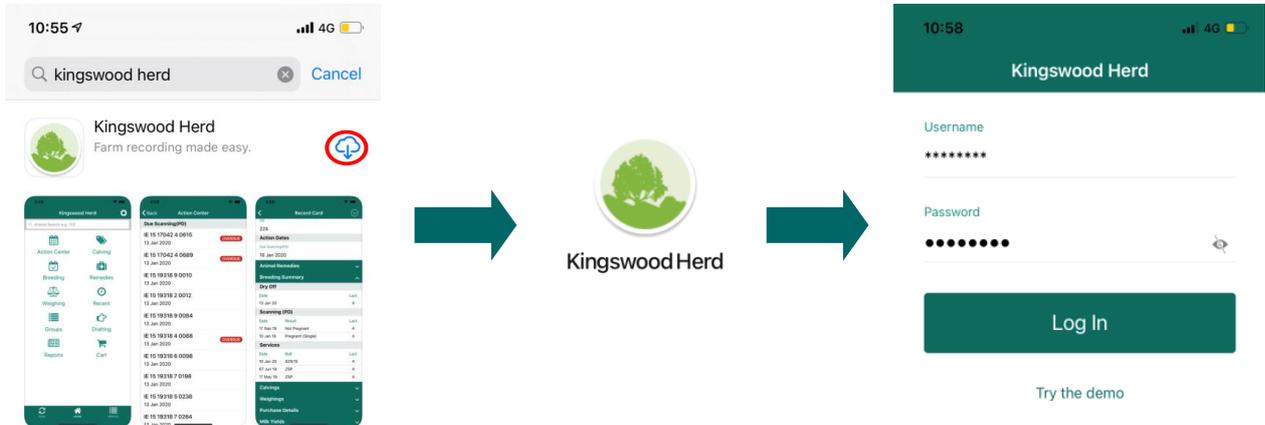

Kingswood Mobile App on Smartphone

Download and Setup App

Open the Apple/Play store in your Apple/Android phone. Then type into the search bar "Kingswood herd" and select search. The Kingswood Herd icon and app preview shown below should appear, hit download.

Find the Kingswood Herd app icon on your phone and open the app. Enter the username and password previously provided to you to log in.

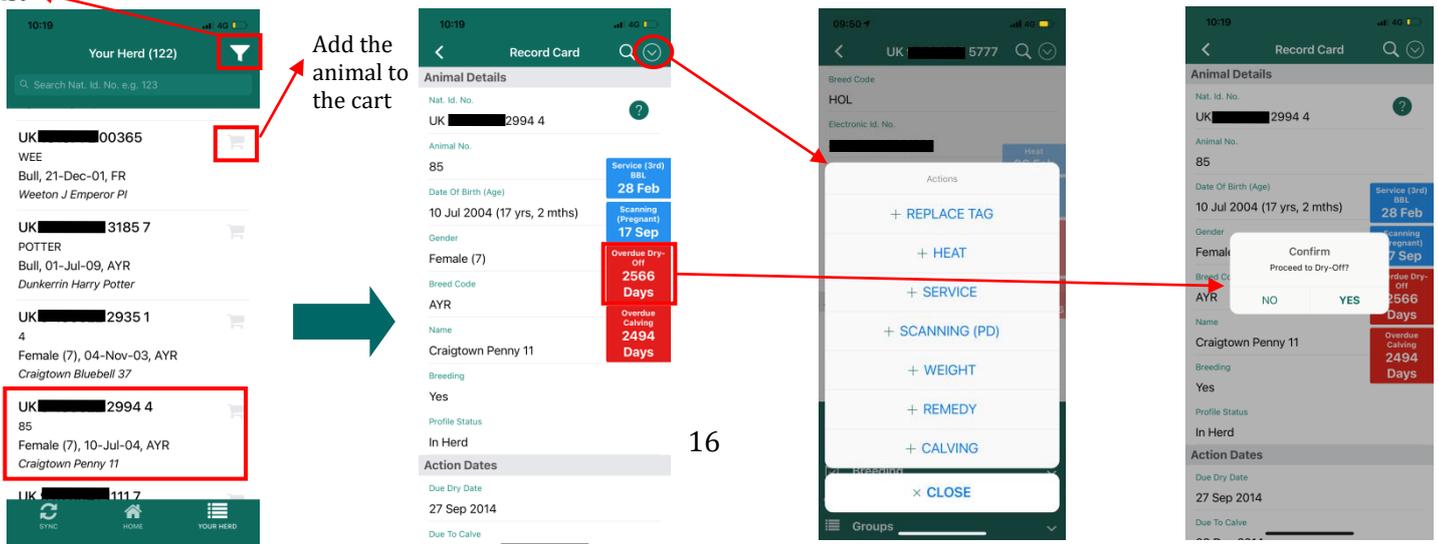

App Layout

Your herd

Selecting the "Your Herd" option at the bottom right of the screen displays the screen below. This contains a list of all the animals in your herd. Enter an animal number in the search bar to search for a particular animal.

The funnel symbol at the top right of the screen also allows you to filter the animals in the herd list by different criteria. Selecting on an animal number will bring up the record card for that particular animal shown below. On the record card selecting the white circle with the down arrow at the top right of the screen will produce a list of actions. This allows you to add e.g. a weight etc to that particular animal. The record card will also contain blue and red boxes at the right hand side of the screen. The blue boxes will display previous action dates such as service/calving etc. Clicking on the blue box will bring you to that section in the record card. The red boxes display overdue actions such as dry off or calving etc with the number of days overdue stated. Click on the red box to complete the overdue action, select yes to proceed with the completion of the action. To search for another animal while in the record card of another animal, select the white magnifying glass icon at the top right and type in another animal number or simply select the back arrow at the top right of the screen.

Filter the animals shown in the herd list

Quick Sync Finished.

Last Sync: 05-10-2021 14:59:45

Sync

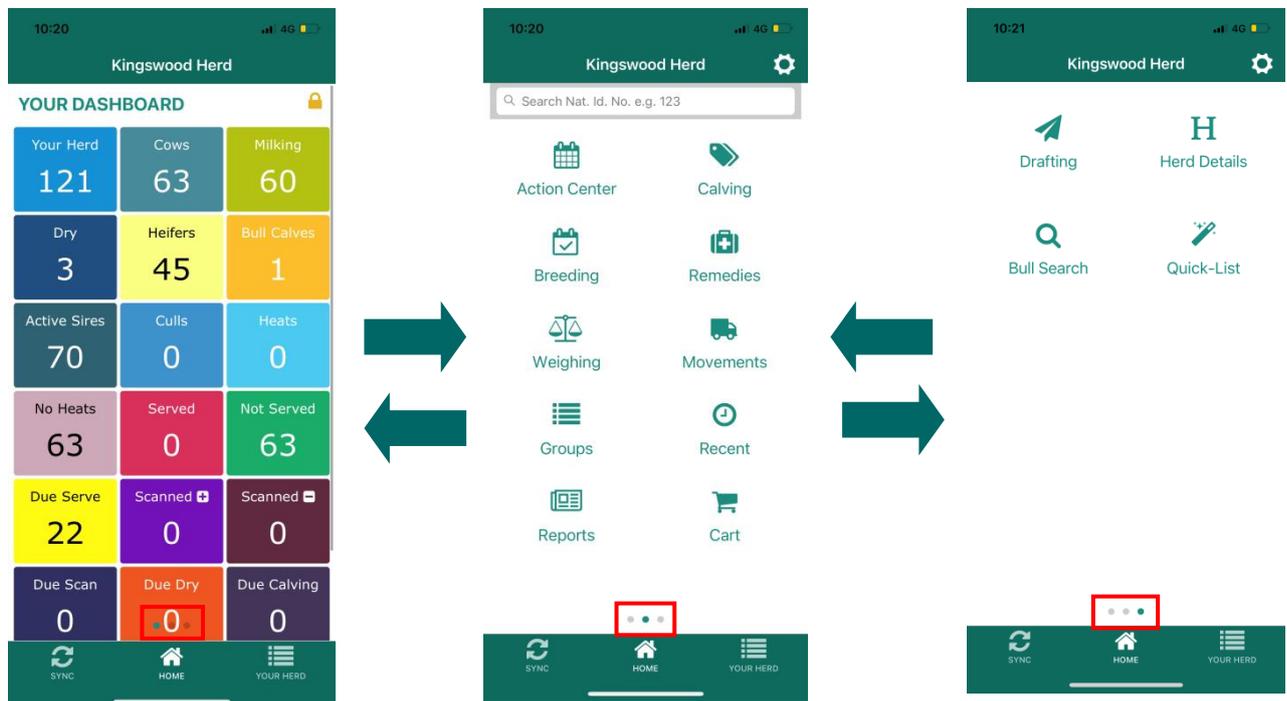

Selecting the “Sync” option at the bottom left of the screen displays the screen to the right. It is important to sync after changing or entering any data on the app once wifi/signal is gained. This will update your Kingswood account across all devices and programs. Similarly to download any changes made on other devices/programs sync is also important to update the data on your phone. By selecting the bottom left logo your app will automatically sync and display the last sync information. **Before logging out of the account you must sync first.**

To download the latest information from the server and other devices tap the 'FULL SYNC' button.

Home Pages

Once logged in, you will automatically be brought to the home page option. There are 3 main homepages of the app. The middle image below is the main home page; the 3 dots highlighted show you which homepage you are on. Swiping to the right will bring up the Dashboard page that contains an overview of your herd's statuses shown on the left below. Swiping to the left produces a page of common shortcut commands shown in the image below to the right.

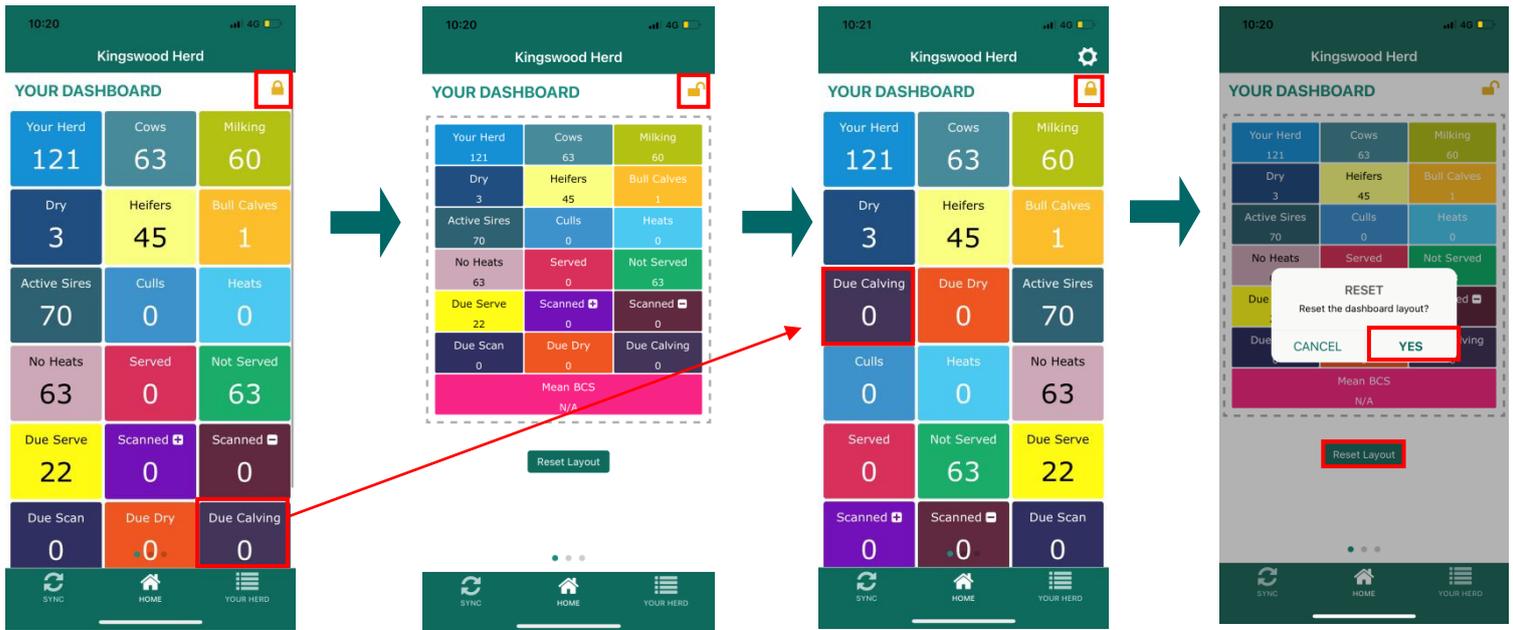

Dashboard

The dashboard shows the current status of your herd for a range of different parameters. By tapping on a coloured square e.g. “Your Herd” this shortcut will automatically bring you to a list of all the animals in your heard. This is the same for the rest of the dashboard parameters on your screen.

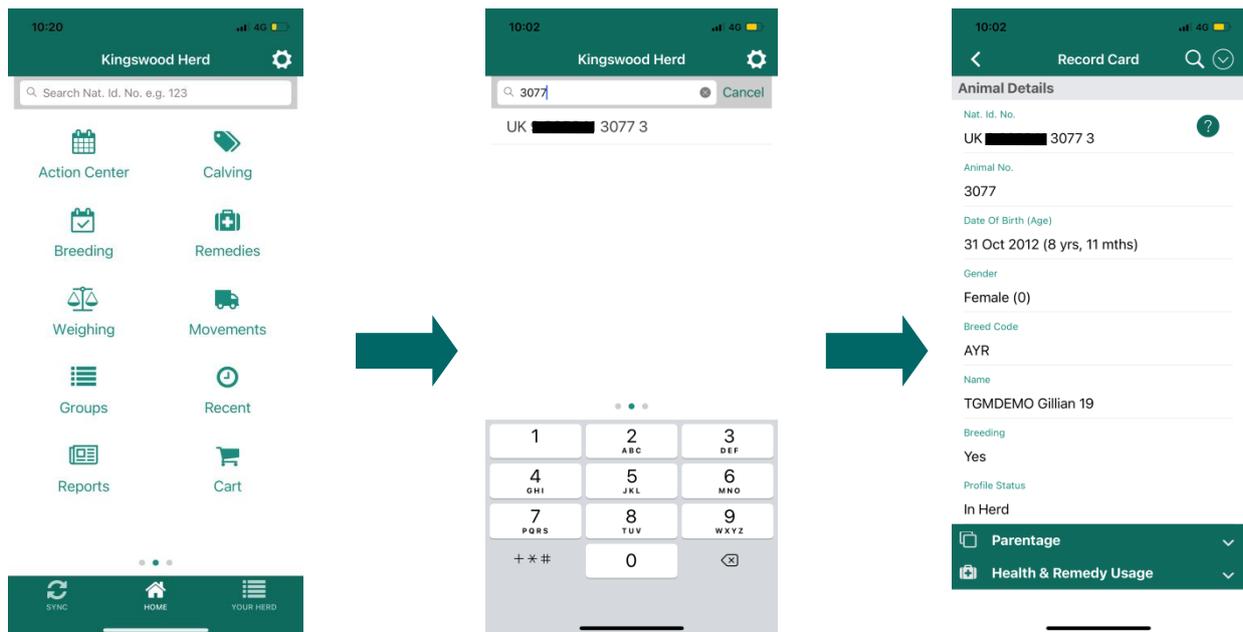

To edit the priority of your shortcuts select the yellow lock symbol. The new screen should appear with the yellow lock now unlocked; this means you are now in editing mode. Drag the coloured box shortcuts in the order that your prefer. Select the lock symbol again to save the

changes, this is highlighted below where the “Due calving” box has now been moved. If you wish to reset the changes to your dashboard layout, go into the edit mode and select reset layout.

Main Home Page

The main home page is the screen shown below. Entering an animal number in the search bar at the top of the screen searches for that particular animal and brings up their record card.

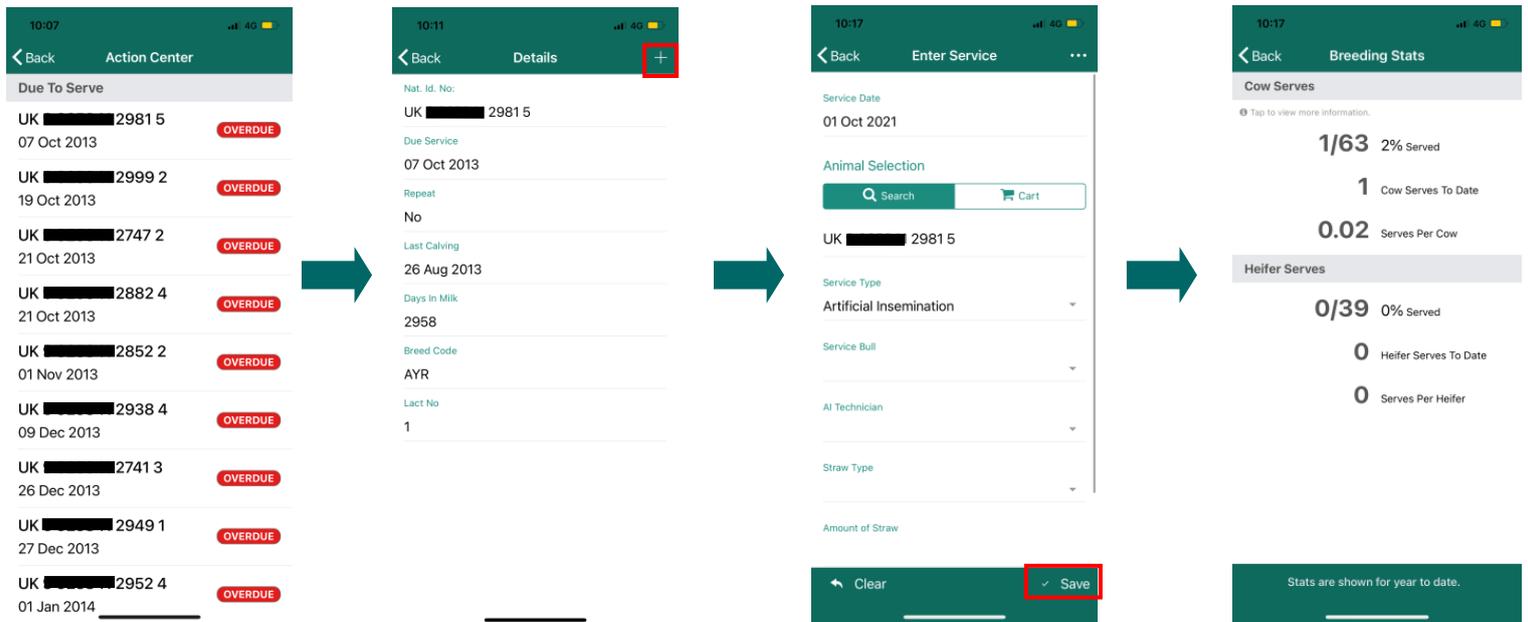

Action Centre

Selecting the “Action Centre” on the homepage will show a list of animals that have actions due to be completed e.g. to be served. Selecting on that animal will display details of that action for the animal shown below. To then enter that the action has been completed e.g. service for the animal, select the white plus button at the top right of the screen. This will produce an enter

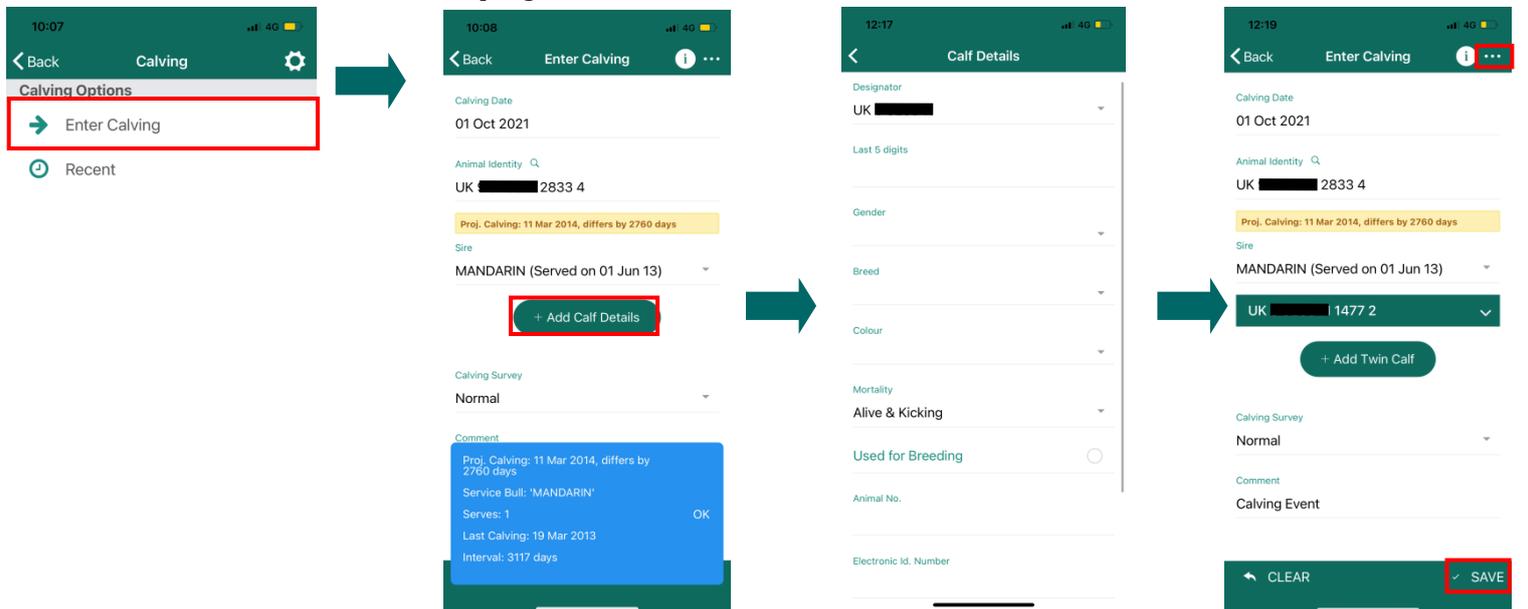

action screen, in this example “Enter Service”, which you can complete and select save. Once completed it will automatically update and show your breeding statistics, select back and it will bring you back to the action centre screen. However, if you wish to cancel entering the service, select the 3 dots at the top right of the screen and select home.

Calving

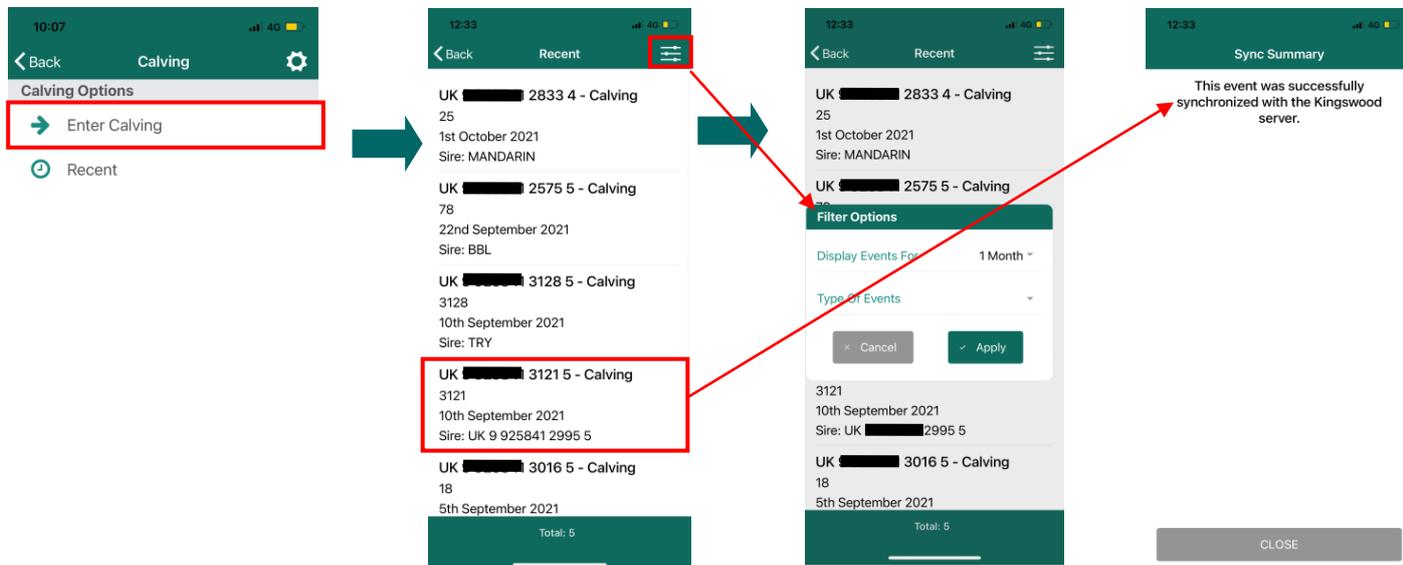

Enter Calving

Selecting the “Calving” option on the homepage will display a calving screen displayed below. To enter a new calf into the system, select the “Enter Calving” option. Complete the correct date and dam of the calf. Select “Add calf details” to enter all the details of the calf and select “Add” at the bottom of the screen. To add the details of a twin calf, select “Add twin calf” and complete the screen as before. When all is completed select the save bottom at the bottom right of the screen and the calf(s) have been entered. To cancel entering the calf and return to the home screen select the 3 dots at the top right of the screen and select “Home”.

Recent calving

Selecting the “recent” option in the calving screen produces a list of recently entered calves shown below. It is possible to filter the list of calves displayed by selecting the 3 line symbol at the top right of the screen. This will then bring up a list of filtering options. Selecting on a calf that has been entered will show whether this calf has been successfully synced to the Kingswood server or not.

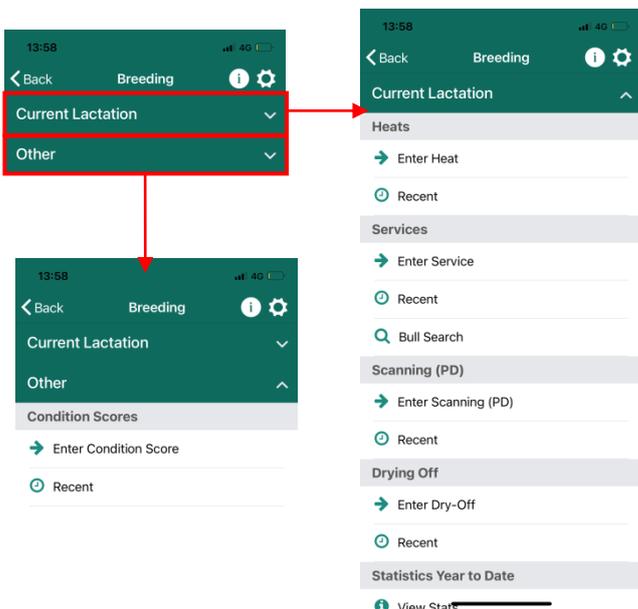

Calving Settings

Selecting the options icon at the top right of the calving home screen will allow the preferences for new calves to be changed as seen below.

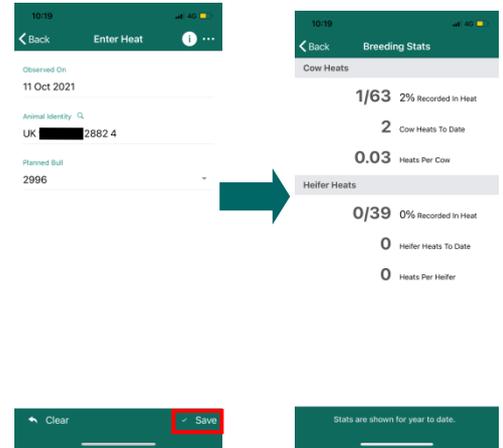

Breeding

Selecting “Breeding” option in the homepage will produce a list with an option to view “Current Lactation” actions or “Other”. Selecting to view more of the “Current Lactation” will display a screen to enter or view recent heats/services/scans/dry offs for your herd. Additionally you will be able to view the breeding statistics of your herd. The “Other” option allows you to enter and view recent body condition scores for your herd.

Entering a Heat/Scan

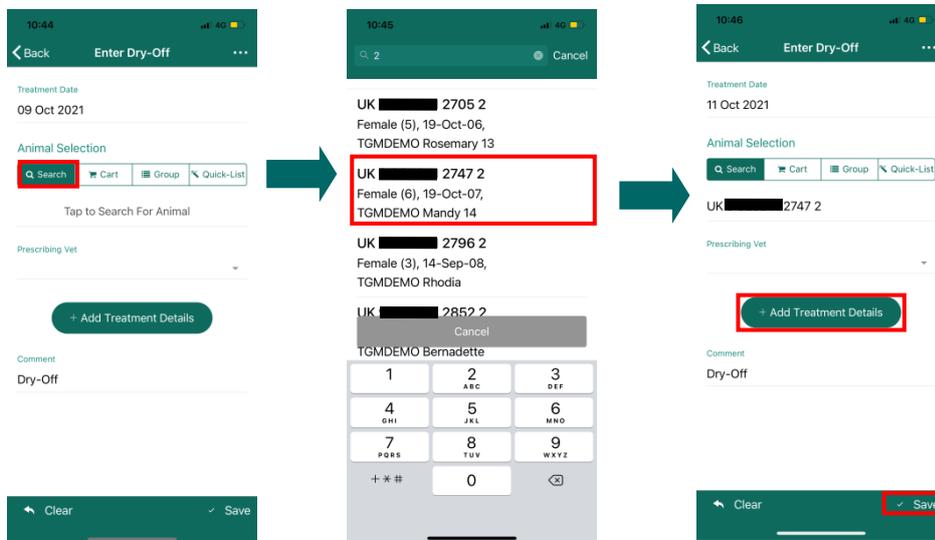

Select “Enter Heat/Scan” and search and select the animal number the action applies to. Fill in the appropriate fields and select “Save” at the bottom right of the screen. Once completed the Breeding statistics for your herd will be shown as displayed to the right.

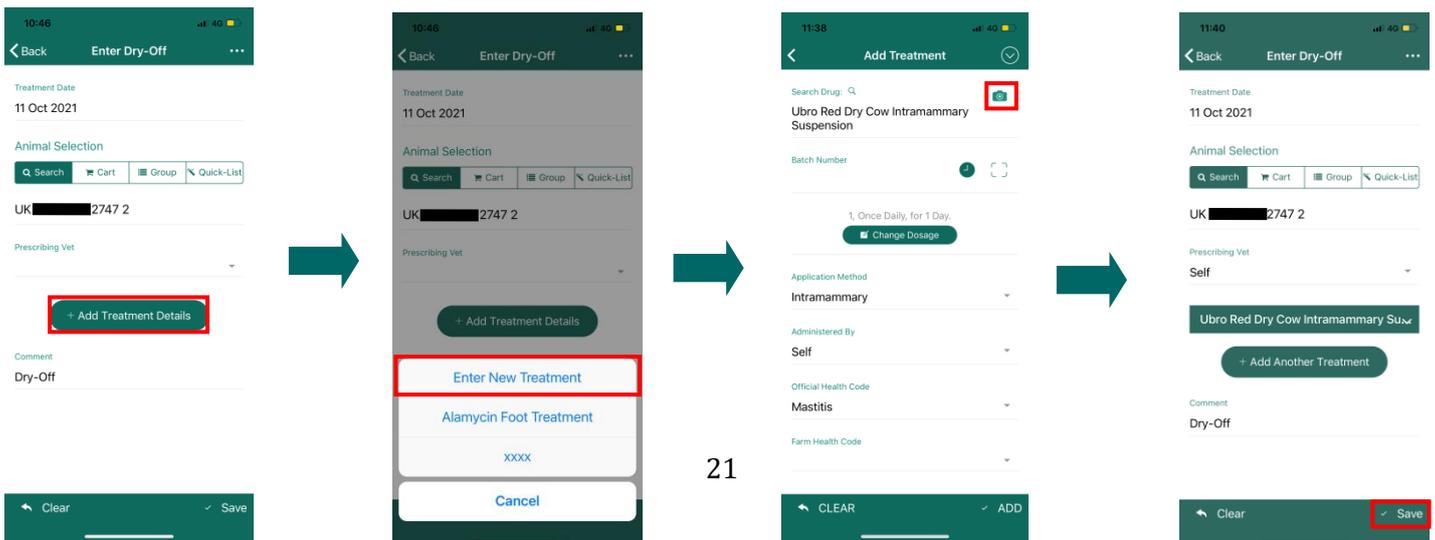

Entering a Service/Dry off

Entering a breeding event to 1 animal

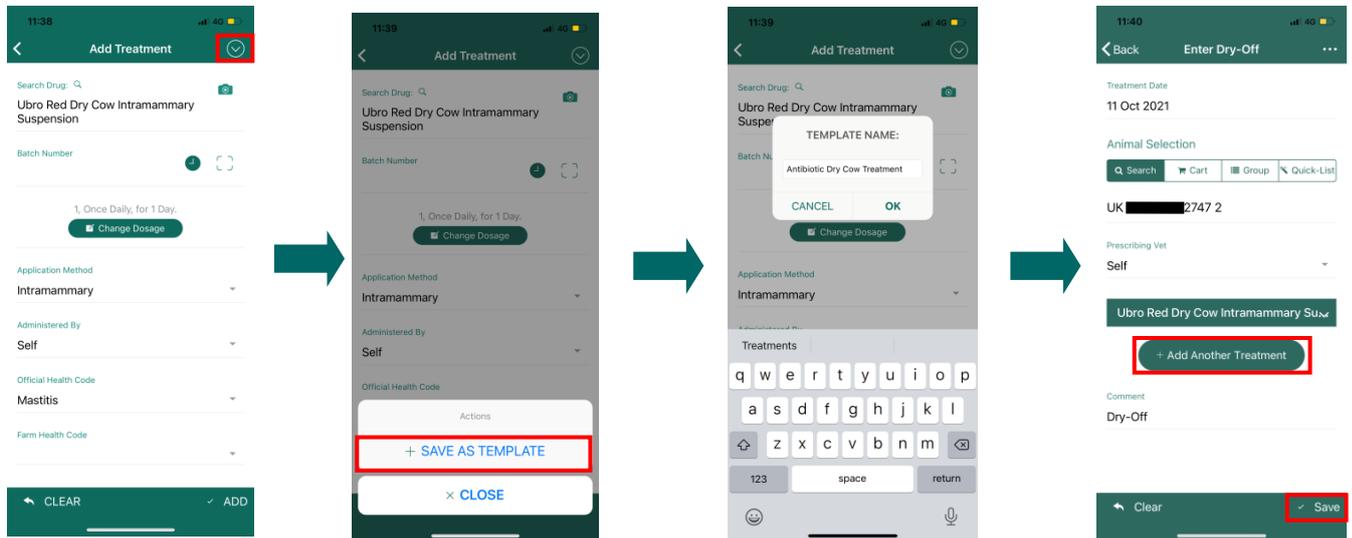

Select “Enter Service/Dry off” and then search and select the animal number that the action applies to. Fill out the appropriate information. If entering a dry off action and the animal has not been treated during dry off simply select the “Save” button at the bottom right of the screen as shown below.

However, if the cow has been dried off with a treatment administered to it at the same time, select “Add Treatment Details” option before selecting save. If the treatment is not on your list of saved treatment templates select “Enter New Treatment”. Then fill out the appropriate information on the treatment given including the dosage. It is possible to search for the drug or select the camera icon to take a photo of the drug label to automatically insert the information of the drug in. Then select “Add” at the bottom right to complete the details of the treatment.

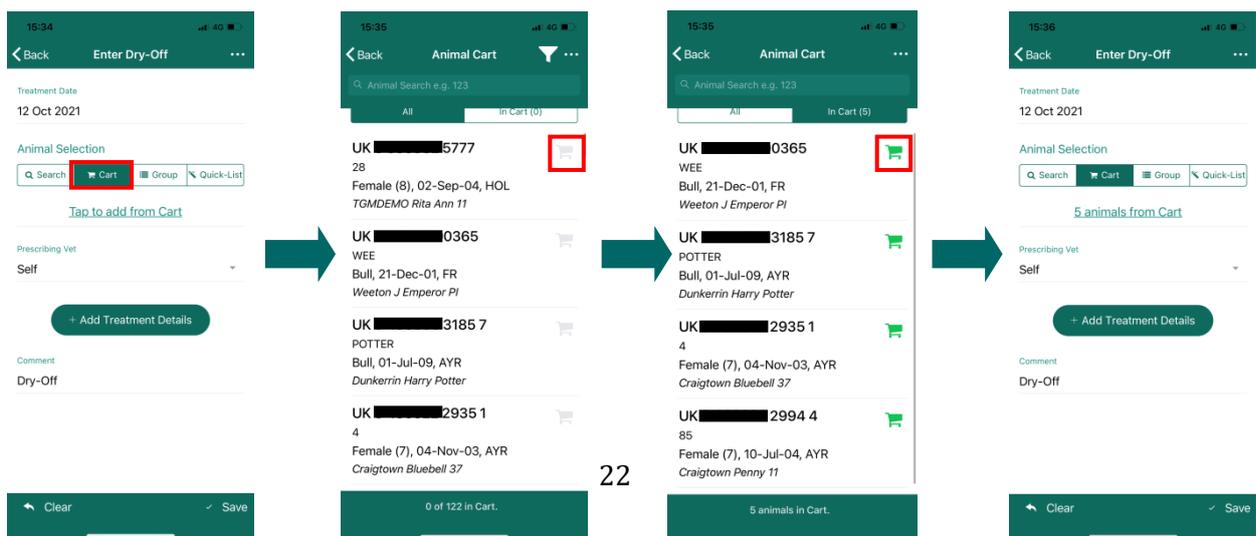

If the treatment being entered to the treatment details is commonly administered in your herd, create a template to allow quicker entry for this treatment for other animals. To do this select the white down arrow in a circle button at the top right of the screen after all the treatment details have been entered. The "Template Name" box will then be displayed, enter a chosen name for this specific treatment. Continue selecting the "Ok" button to create the template until you are back to the "Add Treatment" screen. Once back to the "Treatment Details" box, to finish adding the treatment select the "Add" option. The details and dosage of this treatment is now stored and can be used in future rather than selecting "Enter New Treatment". If multiple treatments have been added to an animal during dry off select "Add Another Treatment" and complete as before. Once all treatments have been completed select "Save".

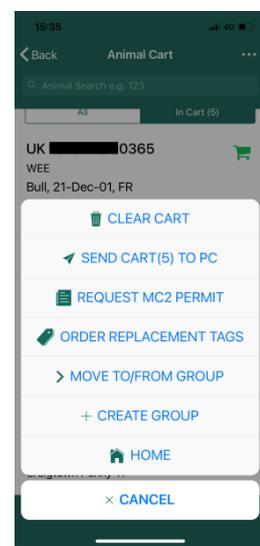

Entering a breeding event to multiple animals

To enter a "Service/Dry off" to multiple animals, select the desired breeding event e.g. "Enter Dry-off" and then select "Cart". Then select "Tap to add from cart" and a new page "Animal Cart" will be displayed where it is able to search for specific cows in the search bar or filter using the funnel symbol at the top right of the screen. It is also possible to select different categories to filter the herd by. Select the shopping cart icon beside the animal number to add it to the cart. When an animal is in the cart the shopping cart icon will be green. To remove an animal from the cart select the green shopping cart icon and it will turn white again when the animal has been removed. To view all animals in the cart select "In Cart (X)". Once the correct amount of animals are in the cart, select "Back" and continue with the dry off process as stated before when finished select "Save".

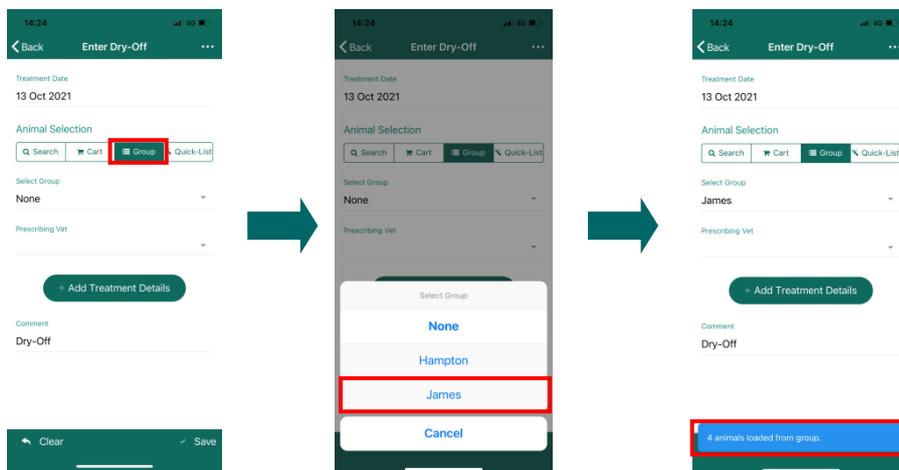

Furthermore, when editing the animals in the cart, selecting the 3 white dots at the top right of the screen will display a list of actions that can be completed against all the animals in the cart. Here it is also possible to clear the animals in the cart. The list is displayed to the right.

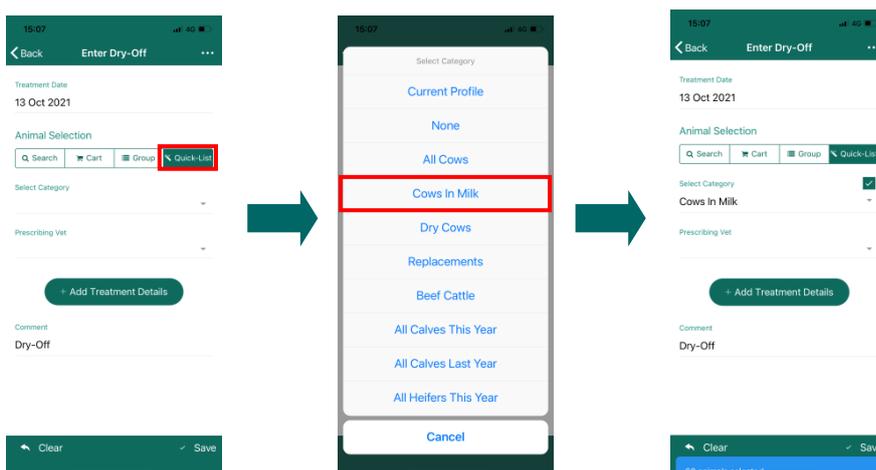

Entering a breeding event to a group of animals

To enter a dry off to animals that have previously been placed in a designated group on the software, select the “Group” version in the “Animal Selection”. Then select the name of group with the intended cows to be dried off. Once selected a blue banner at the bottom of the screen should be displayed to inform you how many animals are in this group. Select “Save” at the bottom right of the screen and then “Yes” to complete drying these cows off. To edit the cattle in the groups you must select back to the homepage and select “Groups”.

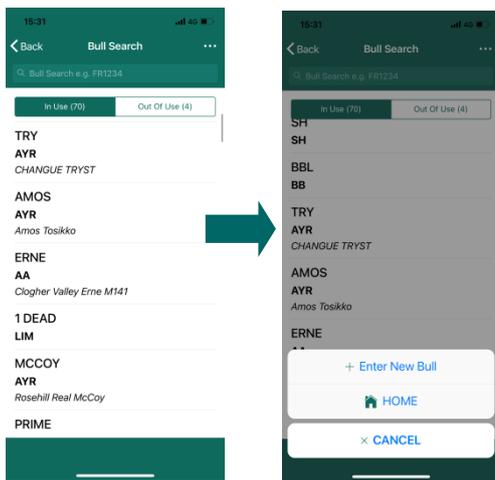

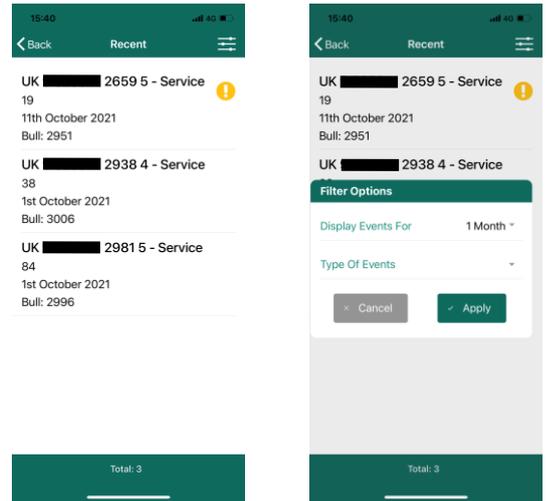

Entering a breeding event to a quick list of animals

To enter a drying off event to multiple animals in a quick list, select “Quick List” in the “Animal Selection”. Select an appropriate group from the different category of animals on your farm which is displayed below. Then proceed to complete the breeding event as stated before.

Viewing Recent Heats/Services/Scans/Dry Offs

To view a recent breeding event, select the recent option for the desired event e.g. "Recent Service". The animals recently serviced will be displayed. To filter through the animals service details, select the 3 lined symbol at the top right of the screen and fill out appropriately for the desired animal services. This is the same for heat, scans and dry offs, to view these simply select back and select the new desired recent service option.

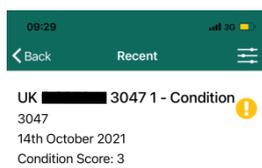

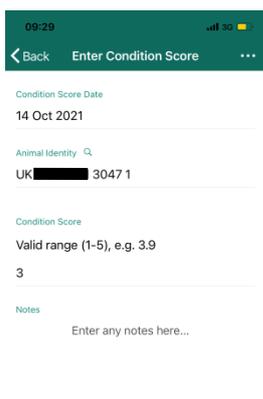

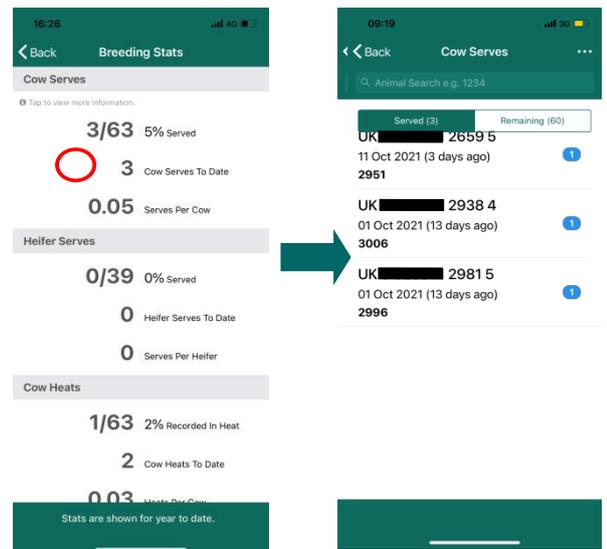

Bull Search

To search for a bull whether it is in use or out of use in your herd, select the "Bull Search" option on the breeding menu. Select to view the "In use" and "Out of use" bulls by selecting on the appropriate option. To enter a new bull in your herd select the 3 white dots at the top of the screen and select "Enter new bull" and fill out the details.

Viewing Breeding Statistics

To view the breeding statistics of your herd displayed to the right select the "View Stats" option in the breeding menu. All breeding events for heifers and cows will be displayed for your herd. Tap on the white background underneath the desired category e.g. "Cow serves", this will then display a list of cows that have been served and the remaining cows to be served in the herd. Selecting on a cow from the list will show the record card of that animal.

Enter/View Recent Condition Score

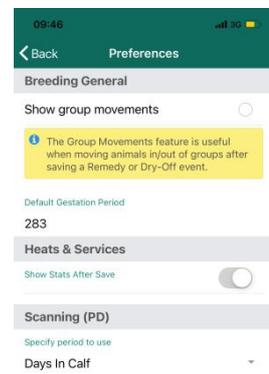

To enter the body condition score of an animal select "Enter Condition Score" in the breeding menu. Search for the appropriate animal, write in the score and select "Save". To view the recent body condition scores entered for your herd, click back and select the "Recent" option. Here a list of animals with their body condition scores will be listed. It is possible to filter the animals by selecting the filter icon at the top right of the screen.

Breeding Settings

To adjust your breeding preferences for the app select the white cog at the top right of the breeding page. The screen to the right will be displayed and adjust accordingly.

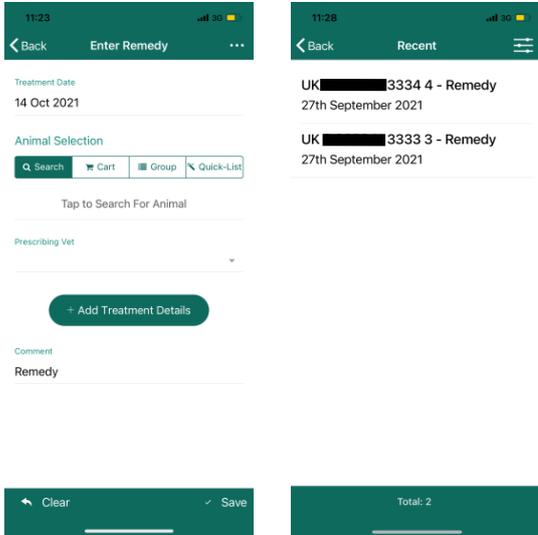

Remedies/Feed

Enter/View Recent Remedy

To enter a treatment to a specific/cart/group/quick list of animals select the “Remedies” option in the homepage menu. The screen on the left “Enter Remedy” will be displayed, add a treatment to the desired animal(s) as described in the breeding section page 21, 22 and 23. It is possible to add multiple treatments to the same animal(s).

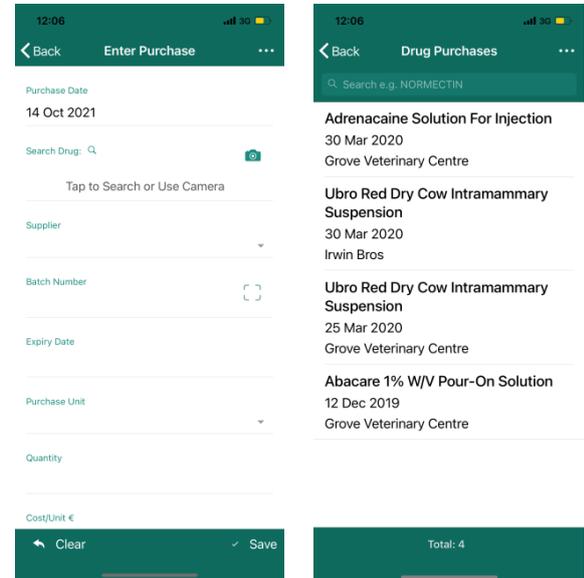

To view the recent animals that have had treatment administered, select the “Recent” option under the “Remedy Treatments” section. The screen to the left will be displayed. It is possible to filter the animals by selecting the icon at the top right of the screen.

Enter and View Drug/Feed Purchase

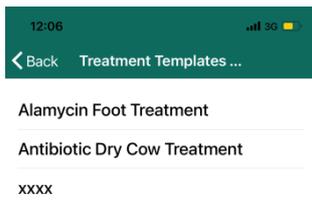

To enter a drug/feed purchase, select “Enter Drug/Feed Purchase” in the Animal Remedies screen. Fill out the appropriate information and select “Save”. Entering a drug purchase has a photo entry option available described at the end of page 21.

To view any drugs or feed purchased on the farm select the “Drug/Feed Purchase” option on the animal remedies screen. The information is presented on a list where it is possible to search for a particular one.

Treatment Templates

To view the list of treatment templates made during breeding and remedies, select the “Treatment Templates” option in the animal remedies screen. Here it is possible to view all templates made but not to edit them, displayed to the left.

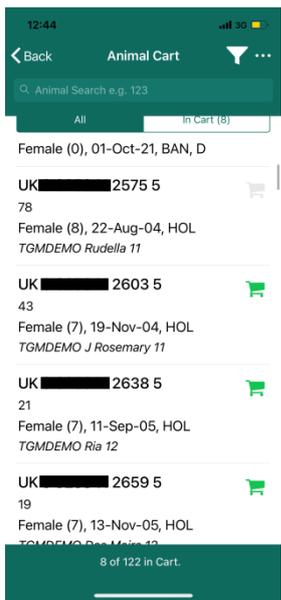

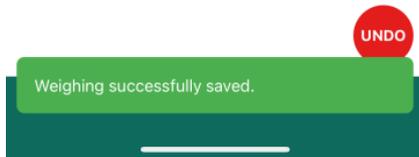

Vaccinations Due

Selecting the “Vaccinations Due” in the animal remedies screen will display a list of vaccination reminders. It is possible to select to view past reminders by pressing the filter icon at the top right of the screen.

Weighing

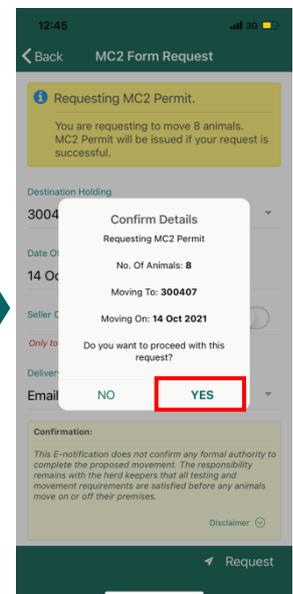

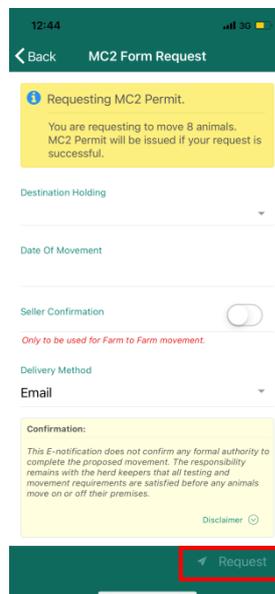

To enter weighings for your herd select the “Weighings” option in the homepage menu. Fill out the screen with the appropriate information including the weight in kilograms, displayed to the right and select “Save”. Once successfully entered a green banner shown below will be displayed.

Movements

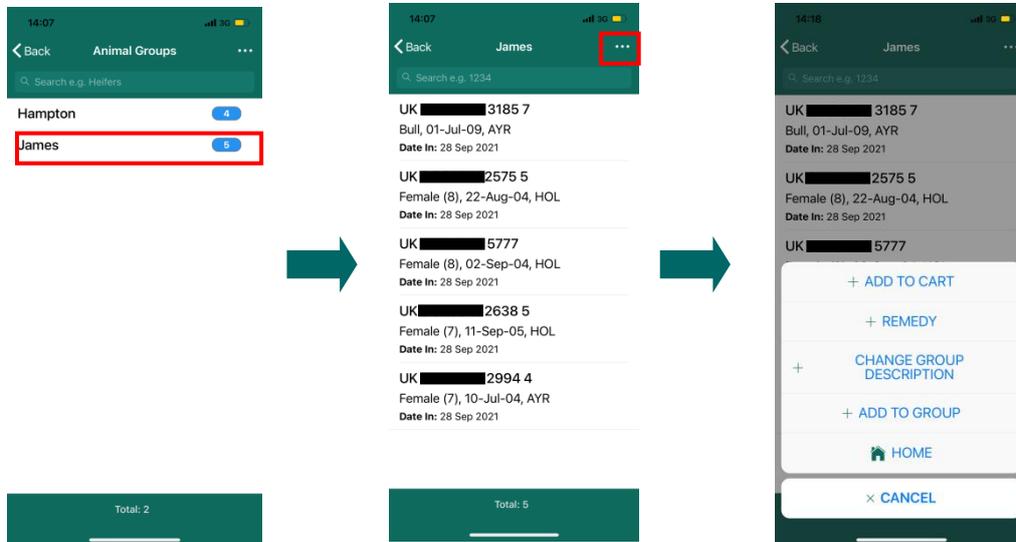

To make an MC2 movement permit, select the “Movements” option in the homepage menu then click “MC2 Permit”. The animals in the cart will appear in the selected section of the MC2 permit screen. To alter the animals in the cart that are being selected for the movement permit, select the cart symbol at the top right of the screen. Add and remove animals from the cart as stated in page 21 previously. Once the correct animals are in the cart select “Back” out of the animal cart and select “Continue” at the bottom right of the screen. Fill out the appropriate information and select the delivery method then select “Request” and “Yes”.

 Groups

Groups

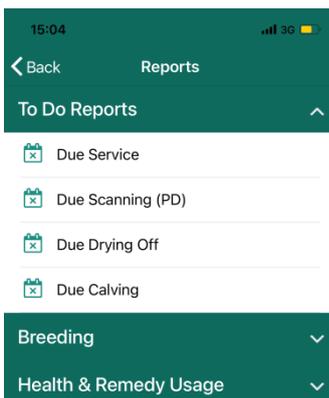

Selecting the “Groups” option on the main homepage will display a screen which shows the different premade groups of animals within your herd. Selecting on a group will display all the animals within that group where you can search to find a specific animal. Selecting the 3 white dots at the top right of the screen will produce a menu displayed below where you can add animals to the group, add that entire group to the cart or add a remedy to all the animals in that group.

 Recent

Recent

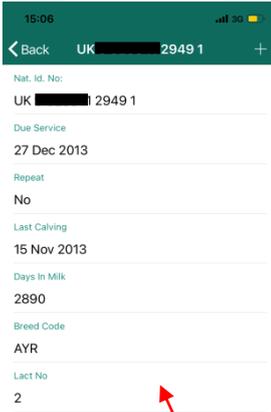

Selecting the “Recent” option on the main homepage will display a screen of all the recent events that have been applied to your herd, as displayed to the right. Any actions applied on the app that have not yet been synced will appear with a yellow exclamation mark beside. It is also possible to filter which actions are viewed by selecting the filter option at the top right of the screen.

 Reports

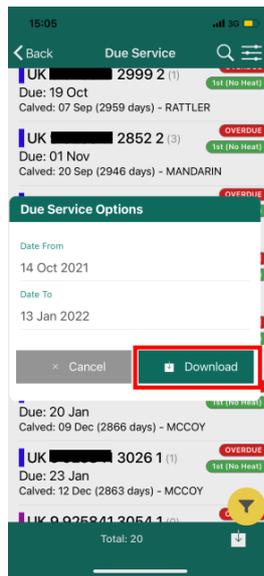

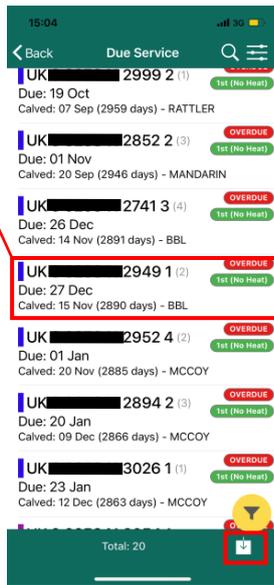

Reports

To view the To Do, Breeding and Health & Remedy Usage reports select the “Reports” option on the main homepage. The different reports available to you is displayed to the left.

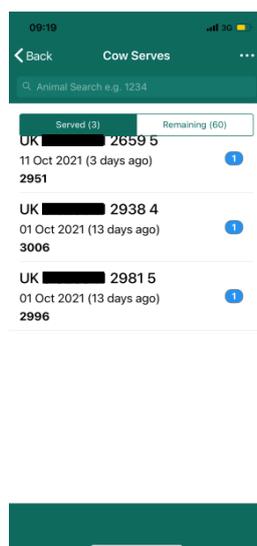

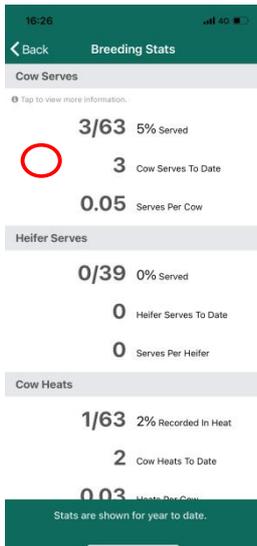

Viewing service/scanning/dry off/calving reports

To view a breeding report e.g. service, select the “Due Service” option in the reports menu. A list of all the animals due to be served is displayed. Select the icon at the bottom right of the screen and enter the dates required. After selecting “Download”, a report of the cattle and all their details will be displayed. This report may be printed or emailed by selecting the icon at the top right of the screen. Selecting on an animal in the list will then produce its record card with its details and selecting on the plus icon at the top right of the screen will allow more actions to be added to the animal. A filter option in the yellow circle is also available to filter the animals in the list. The due to scanning, dry off and calving report options all work the same as the due to service report described.

Breeding Stats Report

To view the breeding statistics of your herd, select the “Breeding Stats” option in the reports menu. All breeding events for heifers and cows will be displayed. Tap on the white background underneath the desired category e.g. “Cow serves”. This will then display a list of cows that have been served and the remaining cows to be served in the herd. Selecting on a cow from the list will show the record card of that animal.

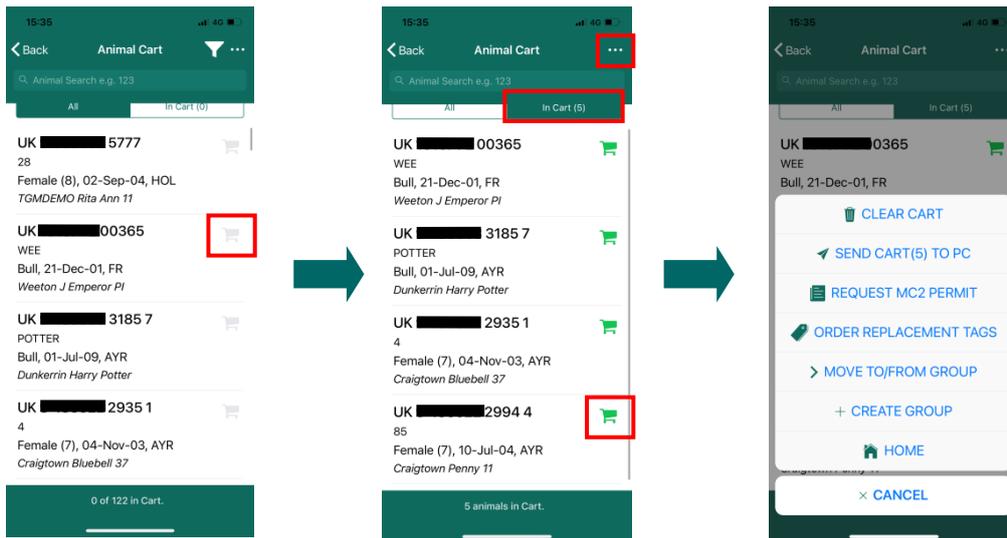

Vaccination Reminders

To view the vaccination reminders for your herd select the “Vaccination Reminders” option in the reports menu.

Cart

Selecting the “Cart” option in the homepage will display a new page “Animal Cart”. Here you are able to search for specific cows in the search bar or filter the herd by different categories by selecting the funnel symbol at the top right of the screen. Select the shopping cart icon beside the animal number to add it to the cart. When an animal is in the cart the shopping cart icon will be green. To remove an animal from the cart, select the green shopping cart icon and it will turn white again when the animal has been removed. To view all animals in the cart, select “In Cart (X)”. Select the 3 white dots at the top right of the screen when on the “In Cart” option. A list of actions that can be completed against all the animals in the cart will be displayed, shown below.

Shortcut Homepage

The third homepage screen contains multiple shortcuts for the quick access to data, displayed to the right.

Drafting

Anyone using auto drafting please contact Kingswood to enable this feature.

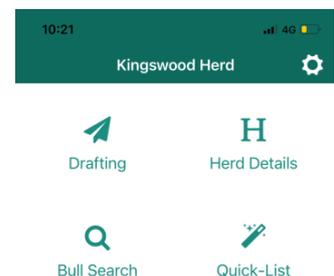

Herd Details

Displays details such as the herd type selected e.g. dairy or beef which will alter the features available to you on the app depending on your system.

Bull Search

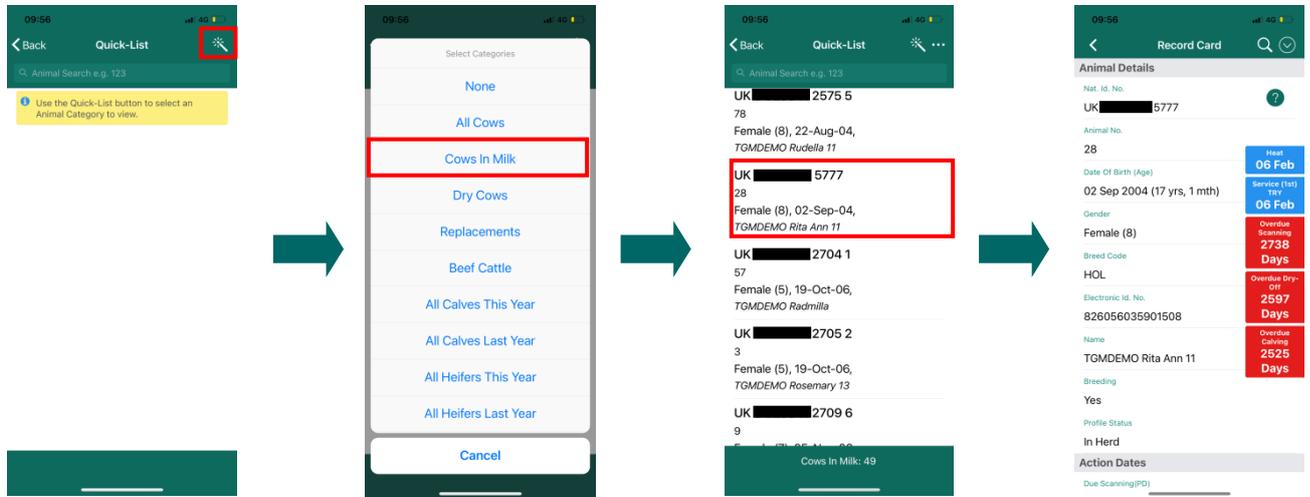

Bull search has been described on page 23.

Quick List

To quickly look up a group of animals in the “Quick List” option, select the wand icon at the top right of the screen and select the desired animal group. The animals for this group will be displayed in a list where it is able to search for a particular animal. Selecting on an animal will bring up its record card shown below.

Settings

To get into the apps settings, go to the home page and select the white cog at the top right of the screen. The settings menu will be shown, displayed below. Here you are able change your preferences for the app, view your herd and account details and link your account to Cormac Tagging.

Logging out of your account

To log out of your account, select the settings option in the home page, select account and select the symbol at the top right of the screen. This will display the option to log out. **Ensure you have synced your data before selecting the log out button.** It is not necessary to log out of the app after each use.
